(May 9, 2018 05:14 AM)Big G Wrote: [\[CITE\]](#) This is one of my favorite products on HF ever.

Neos07 is legit guy, very professional. Options using this are unlimited, spoofer IS WORKING as promised!

You don't even have to pay for smtp, Neos provided me with a few links for a few free smtp services and 1st one worked as it should.

This is a great stuff for both legal and illegal businesses LOL.

Thank you Neo! (Apr 25, 2018 07:47 AM)therealdeal777 Wrote: [\[CITE\]](#) I bought the roarbomber mass mailer yesterday and it was delivered as advertized. Neos07 was very supportive and he help me with all my queries. he is really a very good seller. This is the first time I am purchasing on hf and I wasnt disappointed. Thanks Neos07 ? ? ? Note that clients will get free updates for lifetime, and updates may rise the price, so get it as it's this cheap.

Added an email scraper, you can use it to scrape emails off a website page, all you have to do is to save the source of the page to a txt file and use the email scraper in RoarBomber:

Such an sms bomber can't work worldwide, it works with specific carriers.

Italy, I found that these carriers have an email to sms gateway and may work:

I uploaded more than that number alot, and didn't have an issue. I think you kept trying to spam click on the window while it's adding, which occurred the "non responding", and that doesn't mean it stopped working, you just didn't give it the enough time.

Tbh, adding this to all versions of the mailer would probably increase your amount of customers.

Tbh, adding this to all versions of the mailer would probably increase your amount of customers. If it's just randomizing the sender's email, it won't be much, and also you aren't dropping \$19.99 on a sms bomber, it's an AIO tool, functional, can be used for mass mailing, bombing emails, bombing sms etc.

The best way to do this would probably be adding a wildcard feature, replacing any '*' found in the sender email field with a randomly generated number. Do it however you would like though.

And yes I am aware, I probably should have communicated what I meant differently. I mean that I don't know if I should spend \$20 on a tool that I will only use for SMS spamming maybe once every few weeks. ?

Yes that's how I would do it, and that's how it is in the randomizer of the subject, It replace %d with a random digit and %u with an upper letter and %l with a lower letter in every send.

I think the fmail didn't get suspended, you can use it later, or it wasn't old as you said, because the new gmails are who get suspended, for the Hotmail and Yahoo, send me PM with the error and I'll help you with them.

Plus, I showed how and where to get the free private smtps, one of them have a high limit.

Yes, you can add multiple phone numbers and send to them at once.

And yes you have customer support after sale.

+Vouch High Quality Bomber.

Kornflex - December 31, 2016, 3:34 pm

I asked Neos to send me spoofed email as Bill Gates, as bill.gates@gmail.com.

Fully working, check the image below. Straight to my business mail inbox.

Will buy in next couple of days because I have 0\$ in my BTC. After that I'll post my review about the other features of this tool.

@ Neos07

Hy, I have question : sms bomber careers it is worldwide all country ?

email spoofer It can be sent this way ?

Example :

1 email spoof adres gyegfyeg@yahoo.com

1 email spoof adres zyegfyeg@yahoo.com

1 email spoof adres vyegfyeg@yahoo.com

1 email spoof adres 3456765456576gyeg@yahoo.com

1 email spoof adres 234565555656557yeg@yahoo.com

When you fix to send 1000-5000 email, every email it have different address spoof.

You have the test period ?

I bought this program a few days ago custom made for me :) , I had a few problems but Neos07 managed to solve .I recommend this developer it clearly shows that he knows how to work.
Thanks for software and help.

We are looking forward future updates :)

Just a few suggestions :

* save data from application (all data from smtp , to not insert again whenever we open program.Same for "recipients" and "mail" menu).

Okay I have few query before make a purchase.

I need to deliver emails from 100 Gmail accts altogether.

Gmail Restrict to the limit upto 500 mails per day.

i.e with 100 gmail account , i need to deliver $100 \times 500 = 50,000$ a day.

Whats the most possible way to do that from your software?

Hello, Yes you are able to use it for mass mailing and marketing, you can specify the subject, body (can be HTML), add attachments, specify the sender's email and sender's name, Reply-To address where you can receive the replies. You are not supposed to use your email as smtp, if you have gmail or else, I will give you some websites that offer free smtp which you can use for mass mailing.

paulwhite101 - May 8, 2018, 8:20 am

hello does your software need smtp server to power it ?

Big G - May 9, 2018, 5:14 am

This is one of my favorite products on HF ever.

Neos07 is legit guy, very professional. Options using this are unlimited, spoofer IS WORKING as promised!

You don't even have to pay for smtp, Neos provided me with a few links for a few free smtp services and 1st one worked as it should.

This is a great stuff for both legal and illegal businesses LOL.

Thank you Neo!

I don't understand why Avast and Win Defender is seeing RoarBomber as both a trojan and an exploit. Why should such occur for a simple email sender?

I had to disabled both programs to be able to install it but once I enable them they delete roarbomber immediately.

Anyone experience same?

Op is claiming he never SEEN my message, well he's proof (stop playing victim, it wont work)

PROOF - <https://imgur.com/a/2dsS04a>

Skype now shows if message was 'seen' this was 2 months ago. I gave him time to reply if he was
'busy' duh..

Op says no support after 1 year, op never mentioned any terms and conditons neither do i
remember. If he shows proof then i can say im wrong right now.

Op says if I remove my posts he will help me (imtidation tactic) proof: <https://imgur.com/a/6f0i6N3>

Claims im spamming on HF! Do you know spamming mean? Threatening me il get banned. So
customer isn't happy and you play victim because you simply don't want people to see you're true
colors how you treat customers. If support isn't provided after year you should tell me rather than

IGNORE a customer. People need to stay away from this product owner. The product 'was' good but the owner, nope. Attack posts? Anyone with avg LQ will laugh, where did i attack you? Tells me to remove my posts and apologise which I won't be doing since you playing victim like i'm the bad guy here.

And you will help me once i removed it um no? That's not how business works in real world. That just shows you have no idea how to run a business.

Let this stay so people can see.

P.s stop getting your minions like PerfectStorm to defend you.

I am no longer going to bother with this. He simply is acting like child.

Ive worked with Neos07 for over a year now and had no issues. No one tolerates and likes spam messages dude and i really dont get the point of sales trashing the thread the program is HQ and his support is really good more people would vouch and agree. Im using the smtp he recommended and its not working...and year not long. Just because you know someone for a year and no issues does not mean they are trustworthy (its stupid thinking) anything can happen and people can be fake esp on here. Sales trashing? lol I'm a customer. You can lick his ass all you want. The proof is there. You know he's wrong but still won't admit the support for me was crappy. Sheeps will be sheeps.

Hi,

I'd like to buy this cool sw, but have quick questions, please.

Can I load many email accounts for sending like gmail, etc. or do I have to use one by one?

Can I pay with my card (don't have any of the accounts like Skrill, etc.)? I'll buy crypto, if needed, but I have to ask.

Thx
