Thread: [Omegle Spreading Method?](#)

**newbiePT** - July 3, 2016, 7:03 pm

It might not be a perfect method, but for people starting, just like me, i think its easier, and migh deserve a look at it :)

I've already bought 2 Spreading E-Books, and all of those were wasted money. So, i've decided to take the Omegle spreading method, but tweak it a bit.

When you join the Video Secction, you will get lots or pervs, mostly on the Lesbian secction. You got 2 ways of them oppening your Rat.

1st: The ones with the "Stranger Might be Using a simulated Webcam". This has been extremllly effective for me . I just tell them that i use an addon or a patch for ManyCam, wich prevents Omegle to detect it. Thats a PERFECT chance of sending them a .exe file.

2nd: The ones with videos (normal ones) or the perv ones with their own face there. I start the talk them about a great APP i have, wich gets me to see lots of naked girls there.. (The VCW). I show them the buttons in it and what it can do.. 98% of them wants it. And there is another PERFECT reason to send a .exe file to someone .

Sorry for any mistake with my English, since its not my native language.  
I know its not the best working method, wich will give you tons of victims, but its what worked best so far.

I will Edit the Post later, explaining how you get Omegle not to recognize that ur using a Simulated Webcam.

Hope this helps someone!

I'm not into all that spreading and RATting stuff anymore but wouldn't this get you very little numbers compared to...say torrent or search engine methods that could generate a steady 100+ daily?  
Spoiler ([Click to View](#))times might have changed don't cry to me about it, i'm old

No bro nothing better than watching a mentally disturbed pedophile masturbate to weird shit.

no ?

I'm not very good making things look good so someone wants to download it to be honest. At least yet :D

And yes, it won't give you big numbers, but i thought someone would like it too. Its perfect to get Pedos and that stuff.
