No thread design ATM!

NO VOUCH COPIES BECAUSE THIS CONSUMES ME A LOT OF TIME AND EVEN MONEY!
BUT, THE FIRST BUYER GETS 50% OFF FROM THE ORIGINAL PRICE WE AGREE!

Hello guys,

For those who don't know, I am a Game Developer for 6 years now. I have developed games, starting from 2D simple games to 3D MMORPGs. Actually, my MMORPG made it to Steam and had a good feedback, but I suck at marketing and stuff, so I failed to keep the servers online and the game died.

Anyway, what I can do for you is that you tell me your idea or the game example and I will tell you if I can make such a game for you, if yes, we will discuss the price and timeframe. I will only accept Bitcoin.

I can distribute your game to PlayStore and App Store for an extra charge. I can even get any Game on Steam, but it will cost more money and time.

I can develop games for Desktop platforms, WebGL, Android and iPhone. I am using Unity3D since 2010.

I can create games like:

- Multiplayer FPS
- MMORPGs
- RPGs
- 2D RPGs, Adventurers, Runners, etc.
- Racing
- A lot of game types!

I don't have a fancy thread, but for now here is some of my work:

3D Top-Down MMORPG

World War 2 Multiplayer FPS for Mobile
