Anyone can enter, you can only post once, your post # is your entry number

You have to tell me why you like hf for it to go through, to keep away spam
Would prefer that anyway

You can choose your prize, @ninetieth on ig or \$5 bitcoin

I will use random.org

I like HF mostly because of (mostly) nice community that is always willing to help.

Germany69420 - July 5, 2016, 3:35 pm

I like HF because i meet new people and do business here.

I like hackforums because it's a hacking forum, but at the same time a place for programmers to sell their crypters,
other software and shit. But you also have people making businesses online on HF.

It's just really interesting to see how so many different types of people can come together and share their view on things.

I personally like it because I can just chill, lose myself in here and escape reality whilst smoking and drinking some dank ice tea.

I like hf because many users post hq tutorials, and it's fun to scan through the market place with all the interesting products.

Thanks for hosting tldr!

edit: dammit lol
