Thread: [Tokyo Ghou! signature \[Rate/CNC\]](#)

Livewire - July 6, 2016, 11:10 am

I think it turned out fairly well.

Logic Man - July 6, 2016, 2:19 pm

Not bad, I'm not a huge fan of how it's blended. I think the lighting is a bit off and should be more apparent.

The blending is all just smudging.

Lighting-wise i actually didnt try to. I should go back and do that. Lol

CR DESIGNS - July 6, 2016, 5:02 pm

I like the blending and the lighting but there's a lot of useless black space. Try expanding the smudge effect into the black space but very minimal (just so you use all the space).

Effix - July 6, 2016, 5:06 pm

It's nice and all but personally too much anime.

Bkotz - July 6, 2016, 10:09 pm

This makes no sense. Just stop.

OP: Like I told you before, it doesn't look bad but its not impressive either. Very simple. The C4ds are almost invisible, the smudging is nice but its only in a very small section. Lighting needs work and you need to do something with the negative space, or make this a transparent tag. At Least that would make it more interesting.

Thanks for the honest feedback. I was anticipating your critique.

Also, there aren't any c4ds present anymore. It's entirely a smudge signature. I do plan to go and fill the empty space when I get the motivation to re-work the signature.

St. Lucifer - July 7, 2016, 12:03 am

It looks alright bro. You could do better though and you know you could :p i like it regardless though. Good work brah

Minato Namikaze - July 7, 2016, 12:07 am

I would maybe stretch it to fit the whole HF sig size, but besides that pretty good.

Pythonized - July 7, 2016, 2:49 pm

You should remove the black background so it just merges with the standard grey background on HF.

Amazing sig :)!

Rugaru - July 7, 2016, 9:33 pm

Looks alright I guess, I think it has too much black around the borders.

iRontm - July 8, 2016, 8:43 am

Really goood in my opinion! love it.

Welshdroo - July 8, 2016, 10:13 am

i like that , all fits to gather , colors all blend in ... grate work OP
