Thread: [Looking for a free keylogger for USB.](#)

Hoxen - July 7, 2016, 5:38 am

I don't have much knowledge about USB keylogger, so I have some questions.

- Can I use a flash drive(USB) to activate a keylogger on a computer?
- If I got the USB keylogger, how I can get the data that its stored in it?
- How to make a USB keylogger for free? (No need to be very advanced)

Thanks.

In case you really want one, I suggest you use Real Free Keylogger, as it is a great one I use to prank my friends. ?

Well I actually asked them to type something and then backspace it when I was not looking, and later on told them what they wrote. ??
