Thread: [Firefox - When highlighting it doesn't show?](#)

Skidy - July 7, 2016, 6:43 am

For some reason on FireFox, when highlighting any field on my website, it doesn't show the blue highlighting. It can copy it but won't show the blue highlighter when dragging your mouse along the text. Any ideas?

SteezyHB - July 7, 2016, 7:02 am

You can use the following CSS code to overwrite the highlight color

```
Code ::selection {  
    background: #ffffff;  
}
```

```
::-moz-selection {  
    background: #ffffff;
```

}However if you want to know why the current highlighting doesn't work, PM me your website and I'll take a look at the code.

that does fix the problem. What is the default colour for firefox?

Update: Fixed the problem. An API style sheet changed the ::selection and ::-moz-selection.

I over-rid the style sheet on a new page. Works a treat.
