Thread: [\[TUT\] Spreading Method #8](#)

YayHar - July 8, 2016, 6:45 am

Closing these. Reevaluating my time.

iQuintennn - July 8, 2016, 7:15 am

Where are all these HQ posts coming from!?

These are great!

Thanks brother.

But do you think it may work with a different topic?

If I could rep+

Purple Kief - July 8, 2016, 7:17 am

Always good stuff coming out of you, good job man.

EchtaR - July 8, 2016, 7:17 am

First. It's stupid if u use some kind of word and spam it --> move to spam folder

Solution : Write it up to your computer. Capture it and send your message as image --> move to inbox

Mr. Corleone - July 8, 2016, 7:26 am

Shoutout to yayhar for these dope spreading methods.

Love your method's you post, only tried the Minecraft intro one and that is my main method of getting slaves.

I really appreciate it, thanks YayHar!

You forgot to mention when you infect an owner of the haunted house fb pages they can be monetized as well and the malware can be further spread to the followers of the page.

I was thinking about making a tutorial about how to spread through your slaves, like a huge tutorial, maybe later

I'll be sure to rep when I'm allowed, these tutorials are addicting.

Let me know what you would like to see next. It actually helps a lot when people tell me which audience they want targeted.

I wrote up a small little tutorial, not as in depth or as good of a spreading method as I'd hoped. If you want me to update or make another thread about the same topic, let me know I would be more than willing to.

very nice tutorials, thanks

Cferdinand - July 30, 2016, 1:55 pm

This guy is too good. Every tutorial is free and easy comprehension.....Nice work Yayher

drewkasp - August 1, 2016, 7:16 pm

Nice tuts bro, would like to see a method for spreading to business/ importation targets worldwide

Saney - August 2, 2016, 5:22 am

Isn't the Doc/PDF exploit very expensive or am I just mistaking??

It all depends on where you get your exploit from. You can get one for \$50, but it will stay FUD for a less amount of time, or you can buy one for \$500 and have it stay FUD for a very good amount of time.

Also, Macro exploits are way cheaper than silent exploits.

Yeh I did a little research, because the first one of these I ever saw was priced from \$500 to \$900, but I see that there are cheaper now! I hope someone come up with something like this but with an .img
