Thread: [\[-\] Spreading Method \[-\]](#)

spooky hacker - July 8, 2016, 2:17 pm

So, I've been using this spreading method for some time now and it's worked a lot. Although it's not "autopilot" nor that efficient it can still really get you some bots.

Requirements:

- Skype
- Crypted file

Method

Basically, search online for "agar.io" clans. Ask if you can join their clan, they'll usually invite you into a huge skype group full of 8-12 year olds that will literally click anything. Send your file, you can add some background to it like saying "agar.io sick mod" or something like this, but I just send it and get like 20-30 installs. Most of them will download it straight away. Just keep doing that and you'll get a lot of people.

Some Tips: If they don't invite you into the group tell them you wanna check out how many members they got and see who they are. Make your name some weird weaboo shit like "Storm" with a bunch of chinese symbols in it, that's the go-to name for agar.io players.

*Adding another method cause I feel nice

Requirements:

- Able to comment on Youtube Videos
- Crypted file

Method

Basically, go to popular music videos on Youtube. Comment on the video saying one of these: "FREE iTunes GiftCard Generator: (your download link/goo.gl link cause sometimes comments block download links and stuff like that.)"

"FREE Spotify Premium Code Generator: (your download link/goo.gl link)

"FREE Song Downloader, Download any song for FREE: (your download link/goo.gl link)

Or anything else related to getting free music/apps. One of my friends just renamed a .exe to "Drake-Views" and got 20 downloads.

This method is super simple and sorta auto pilot just spam it around in a bunch of comments and you'll get installs.

Thought I'd share these methods with you guys, have a good day. :)

This is a pretty unique and smart spreading method.

The reason why I love this is because you're targetting kids who love gaming, and they probably have parents that buy games for them.

With luck you'll be able to make money from these kids.

Anyone tried this? Seems legit, thanks for the share!!

Peori0y - July 26, 2016, 12:03 pm

Seems like a nice method, even tho I don't really know where to find agar.io clans to join.
