Thread: [Screenshare procedures](#)

BuyMerge - July 8, 2016, 2:48 pm

Does anyone have an updated screenshare procedure? I've heard things about a "cmd" method but never seen it explained. Anyone have a video showcasing it or whatnot?

Iggaming - July 8, 2016, 2:53 pm

There's almost endless methods to screensharing, but it always depends on what you're looking for specifically.

I'm the only one who uses the CMD methods and I make sure the person I screenshare isn't recording and clears the chat logs of what I make him type

They can easily find another way to record without you knowing, or take screenshots.

you act like your the only one for everything, the straightline client, the cmd method, stfu lol.

you like that 10 second ban off hcsquads map 3 young man??? meme

Yes because I'm the only one who does CMD methods, they were never used nor introduced. The straight line idea isn't really a straight line idea, it's a combo extender. Your "activeComboing" value, no idea how you came up with something as stupid as that without looking through the SRC of mine (yes I call it stupid). If you get annoyed then add me to your ignore list. Once again you don't use logic. Oh my god a 10 second ban! What a meme!

I really doubt you can be sure that you're the only person that knows of/uses CMD methods, that's a bit of a silly thing to say.
