Thread: [Modify Twitter Mass Blocker Script](#)

Reika - July 8, 2016, 6:00 pm

I found a working script that blocks and removes all 'egg' followers on Twitter.

```
Code var unList = [];
alert("*****\n*****
@ClaytonnLambert *****\n***** http://blog.claytonn.com
*****\n*****\n > This process may
take some time.\n > This tab will become unclickable while processing.\n > Open a new tab to
browse Twitter.");
$('.ProfileCard').each(function(){

    if($(this).find('.ProfileCard-avatarImage').attr('src').indexOf("default_profile_images/default_profile"
) >= 0){unList.push($(this));  }});
unList.forEach(function(acc){
    if(($('.alert-messages .hidden'))){ $('.alert-messages').remove();}
    $(acc).find('.user-dropdown').trigger('click');
    $(acc).find('.block-text').find('.dropdown-link').trigger('click');
    $('.block-button').trigger('click');
});
alert("> Done! " + unList.length + " egg accounts removed! \n> This page may take some additional
time to become responsive again.");
I'm looking for someone to modify this script to block all followers - not only those who have the egg
avatar.
```

I'm sure this will be easy for someone who knows what their doing to modify but frankly I have no clue about scripting or programming.
