Thread: [Some thousand ewhore earnings in a few days.](#)

Divinity - July 9, 2016, 3:22 pm

Some of you might know, some of you don't. I've been eWhoring since 2010 so for over 6 years now. Never been consistent in it, here and there I've put some work in.

My total earnings are above 30.000€ which would be 34k USD. (if someone wants to see, I can show over TV, its about 20 pages way to many screens lmao ?)

I lately overworked some methods and found out a super unique, kinda greyhat method, which allows me to make 500\$ within 1-2hours max. The method is private and I won't ever sell it unless someone is really interested and has to offer something hq.

Anyways, off to my earnings. I got some earnings the last month, when I was active:

1200+ in 3 days with a daily time input of ~ 3hours.Spoiler ([Click to View](#))

and today, I've put the time from the received eMail from the AGC on the right so you can see it takes literally no time:

Why am I sharing it? Well, I don't wanna brag about the earnings, I just wanna get peoples mind clear, -> you should always get the max out of a customer. Overthink your methods. If someone is willing to pay \$10, you can easily force him to max it to 100\$. If you're super stuck at it, I can always help you out. Just let me know,

besides that, have a great day and keep that in mind ?

Holy fuck! Nice earnings mate, congratulations :D

This motivates me to continue eWhoring, I recently started looking into eWhoring. I'm still setting everything up.

Damn, that's nice. Start mentoring, that's where the money's at. If it requires such little effort, put in maximum effort and make more. Besides that, good job!
