Deviantart is good if you can tolerate their 1-upload-at-a-time system where you have to individually name everything and forcefully assign it to a section.

not deviant art it's not user friendly. someone who want to take a quick look can't access it properly.
I need something like Minus.com

Agreed, use Minus. It is great. Personally I do not use it because my thread design are in several parts (they are animated). So instead I have my portfolio on a site I made.

That is also an option but lil expensive.

What do you ask for a youtube package with:

- Personal Logo (Normal, Simple and Flat)
- Banner (Flat, Simple)
- Thumbnail (Flat, Simple)
- Intro (Motion)
- Outro (Motion)

For a personal filming/drone/vlog channel.

It has been 5 days since i've sent payment and you have ignored me ever since. I have no idea why you would scam \$50 for an easy graphics job... Can you refund the payment if you are unable to do graphics designs

Cryptography - July 23, 2016, 6:20 am

User just made me a decent banner, :) thanks bro

Method - July 23, 2016, 1:46 pm
