Hello, does this method require start-up cash? It most likely does, and if so, how much is required and recommended?

Yes, this method requires start-up money. It really depends on how much you want to earn. 30\$ would be recommended, but definitely works with less than that.

If I purchase this and it does not work out for me, how can I be sure you won't just "deny refunds", as you "have the right to deny refunds"?

PirateSec - July 10, 2016, 7:19 am

Sooo you're showing profit that you've made on paypal with an ebook that is for steam wallets?

I removed it from the ToS now, as i feel it isn't really a fair Terms of Service for the customer. I added a new one now which is if you fail to earn anything from the method in a time frame of 2 months, you get a full refund.

Well, i cashed it out to PayPal. The GabeN package offers PayPal/BitCoin Cashout Ability.

Hamware - July 10, 2016, 7:23 am

The method is simple, easy to understand, contains images for a better understanding. Honestly don't see how you could fail using this method and not make anything. The setup looks very simple, and easy to do. Definitely auto-pilot once you've set it up, I guess you literally just wait and rake the money in. I haven't seen the GabeN method but the standard package will make you some money for sure.

GLWS OP.

Could i get a vouch copy OP, Will do a comprehensive review.

:)

!Soul - July 10, 2016, 7:31 am

I can't find out for the life of me how to use the coupon code.

I guess the coupon system doesn't work in aiobuy. I'll remove it from the post to not bother people with it. My bad. We can still figure out something if you want to have the 50% off.

cuda - July 10, 2016, 7:44 am

any vouch copies?, will do review

P3TER P4RKER - July 10, 2016, 7:48 am

I'll take a vouch copy for a throw review. Since it's new it would be nice to get that 50% off if I cant get a vouch.

Vouch copies are gone, sorry, but I made every package 50% OFF only for today.

Post is very misleading, the "Earnings from this week" is just what he sold this week, after holding off for probably months. (if he even actually did it)

!Soul - July 10, 2016, 9:39 am

After PURCHASING this eBook, I do NOT recommend buying it.

This eBook requires you to wait at LEAST 8 days before you make a profit, assuming you even make a profit. This method involves the steam market and it wasn't until I realized it was too late that I had just dumped \$30 on junk. You will either never make money on this or you'll be sitting on your ass all year waiting for that day to come when you make \$10. OP also changed "earnings made this month" to "earnings made this week". The "bonus methods" you're paying extra for are also public.

That is my HONEST review and I request a full refund and the money I blew attempting this method. This was not an ATTEMPT at sales trashing, but an honest review from an honest buyer.

Feel free to add me back on skype and perhaps talk a LOT of things over, as stating anything more specific would reveal your method and completely trash sales.

EDIT: The method in the eBook also states that you'll be making a profit after only an X amount of increase, which is false which I assume means OP wrote the eBook and never actually used the method himself. It also isn't 100% auto pilot. It's sit-on-your-ass and waiting.

Yes, the method requires waiting (at least it will make you profit for sure, not like other shitty eBooks, methods here on HF).

You are clearly wrong. This method definitely will earn you money.

You will definitely make more than 10\$ in a year.

Most of the "money making methods" are public on HF. People selling actual stuff (shirts, clothes, what not and saying it's the next Bill Gates method).

I guess you are just too used to the usual methods on HF, which require you to do actual work as in sell t-shirts in an online shop (better get a real job) and place a few ads and still fail.

And tell me, how isn't sitting on your ass not 100% autopilot?

!Soul - July 10, 2016, 10:39 am

Alright, since you decided to post in your own thread instead of handling it privately, I guess I'll respond back to you.

First off, you're admitting your eBook is complete bullshit.

(Jul 10, 2016 10:18 AM)DcM- Wrote: [\[CITE\]](#) Yes, the method requires waiting (at least it will make you profit for sure, not like other shitty eBooks, methods here on HF).

I'd say your eBook is even shittier for making people jump in and invest the initial money vs. reading it and then deciding that it's just not the right eBook for them. Even then, it will give you a profit assuming you actually follow through with the eBook.

(Jul 10, 2016 10:18 AM)DcM- Wrote: [\[CITE\]](#) You will definitely make more than 10\$ in a year. I hope you realize that you just admitted to the fact that it would take a year to make \$10. If even a year. There is sales tax that you have to pay and that sales tax will take away most of your profit, assuming you're making a profit and not going losing money.

I purchased the cases at 0.03. To make a profit, I'd have to wait until 130k+ cases to be sold in order for it to reach 0.06, where I would make a one cent profit. I'm sure you're smart enough to estimate how long that would take. I'll help you. Not anytime soon.

Doesn't justify your eBook.

(Jul 10, 2016 10:18 AM)DcM- Wrote: [\[CITE\]](#) And tell me, how isn't sitting on your ass not 100% autopilot?

Don't quote me out of context. It's not autopilot because you're not making money automatically. You're sitting on your ass waiting for the prices to rise. And then you have to manually buy and sell. As far as I know, manual $\neq$ automatic.

What else do you have to say to me?

I also love how you came attacking me even I stated it was an honest review of your eBook. That post only proved to me you're an amateur around here. It was my mistake for jumping in on a cheap impulse buy. Naturally, I probably won't be getting my refund. Sad this is what I deal with coming back to HF.

Sadistic - July 10, 2016, 11:07 am

OP you just got fucking roasted, refund this fine man and close this thread before you get more hate

Wyatt Garcia - July 10, 2016, 11:09 am

Sir please remove your earnings proof or edit them.

If you take a picture from your PayPal balance with like 250\$ on it that proofs absolutely NOTHING. You are selling a Steam wallet filler guide, so you should take pictures from your steam wallet instead of your PAYPAL balance. Also if you currently dont have any money on steam wallet, then go ahead and show us what you did with the money you earned :) The PayPal earnings proof could be inspect element aswell, 0% proof.

Edit: If honest buyer leaves a HONEST review from your product, you cannot say that you are "wrong" when he is giving his review :)

Also you claim that this is 100% autopilot, and the other user who leaved that review seems like its not 100% autopilot..

^ ya'll just pretty much said his method.

Undefined - July 10, 2016, 1:05 pm

Because he started a new thread, here's my review.

I've gotten a vouch copy of the "GabeN package" and here's my honest review.

The method included is okay. It's pretty much known and it's very basic. Anyone can do it. However, the fact that you're charging \$5 more for the GabeN package which includes a 100% public method of cashing out is retarded. I can even say what the method is right here as it is public and everyone knows it. It's OPSkins. I can also recommend BitSkins as I've tried it out myself. I don't suggest buying the GabeN package, but just buy the eBook itself.
