Thread: [Just got the Samsung Galaxy Grand Prime and I want a better phone](#)

So my old phone (samsung galaxy s3) fucked up after I tried updating it so I had to get a new phone. I went to Walmart and bought this phone and it's locked to straight talk only (carrier I have) and on amazon there is the exact phone and it's unlocked same price. I kinda want to get a galaxy s7, I was debating on an iphone but I'm pretty much locked onto a s7. I know they're expensive as fuck but I feel like I will have the phone for years to come and it'll be worth it. What do you think? It'll be A LOT better than this cheap phone. No body wants to walk around with a cheap ass phone with a shitty camera.

The S7 will probably crap out on you after they release an S8, but I'd go for it if I liked Samsung.

LOL This isn't an iPhone we're talking about here, Samsung just doesn't throw you under the bus now do they unlike Apple?

Either wait for iPhone 8 or go with 7S

I'm saying if you want an iPhone, wait for the 8. The current iPhone's are not worth their price in my opinion, not much has changed. And I seriously would buy just a 5S or SE because I like smaller devices.

Anyway, I've read and heard Apple supports older devices for longer times (OS updates) compared to Samsung etc

I have no proof tho

Please don't make me repeat that a third time ?

Patents were bough, strong rumors made, iPhone 8= 10th anniversary,..
So the 8 should be amazing. A design change, material change.. glass phone maybe

Etc
