Thread: [Can you change the caps @ of your twitter handle without losing it?](#)

i a m g o n e - July 11, 2016, 10:35 am

Is this possible? Like lets say i have @Wolff but i want it to be @wOIFf is that possible?

Tahnk you.

If you're not verified, everything should be the same. I honestly don't think someone could turbo a name that quick.

Well actually Twitter's API doesn't work like that. Yes, you can change the capitalization of your Twitter handle without the need of making it available; as long as the length of your username is above 5 characters.
