Afaik I know, the type of pokemons you get depends on your area, if it's grassy, water etc.

Dont even need a VPN.

Just change your region to the United States.

Change your store to the US and make an account then download the app.

Then sign out of the US account change your region back to Canada and sign back into your account.

Was it worth it? Not when its moves are flipping bite (6 damage), and Twister (15 damage). Fml. 1460 power though from a 133 Magikarp.

hahaha

you wasted all that effort on the wrong magicarp to evolve.

usually when i evolve high cost pokemons, i check their moveset first and their CP

if everything is as good as possible i evolve it.

(pidgy,catterpie,weedle are just XP fodder, so i dont count those)

My highest is a lvl 800 Slowbro. Caught him when I was level seven or eight. In the battle it just showed "CP ???". Didn't even know that was a possibility.
