Thread: [Is Pokmon GO all server based or some client based?](#)

Reporter - July 12, 2016, 5:43 pm

I am looking at multiple points.

Is it all server based? or is it possible for me to maybe manipulate how many Pokéballs I have / other items.

Possible to maybe use apps like Freedom to get coins to buy items?

Modify stats maybe?

Mango? - July 12, 2016, 5:44 pm

I dont understadn what your asking but if you download an offline map from google maps it takes up less data/battery

sorry if I didnt help at all

Mr. Corleone - July 12, 2016, 5:45 pm

It is all server based I think. I don't think hacks like these will come.

Glitching/Bugging should be possible but doubt people will share if they find out how.

Drug Problems - July 12, 2016, 5:45 pm

I'm almost 100% certain that it is all server sided, except location of course. However I can not confirm that as I do not have a jail broken/rooted phone anymore.

I don't ask about google maps.

I am asking if the "stats, items, everything in the game" in server based or if some is client based.

Yeah me neither. I am going to crack it if something was client based as I live out in nowhere. No pokéstops close and I don't feel like spending money on the game to buy pokéballs / incense

if ur jailbroken theres a tweak called pokemongoanywhere u just sit in ur house and tap on the map where you wanna walk to

shoup33 - July 12, 2016, 6:27 pm

I need something like this for android. As soon as I enable mock locations pogo wont detect gps
