The Boogeyman - July 12, 2016, 10:29 pm

So I'm deciding to release my first ever full eBook to you guys for free! This eBook is loaded with 17 pages about information like VPN's, Spoofing, Doxing, and so much more! You will learn about many different methods and you will be given many different resources throughout the eBook to ensure you have the correct tools. I will have a picture of the table of contents down below for all of you to see every topic that is discussed throughout the book. This is my way of giving back to the HF community since all of you have taught me so much in one way or another! Just send me a PM and I will send you the eBook as soon as possible! ?

Can i buy a copy from you. im really intressted

Papa Cuda - July 26, 2016, 3:42 pm

Thanks for the ebook.

Taught me some things I was unaware of when it came to decrypters and RAT's.

However, you did give a link to a RAT (Babylon C++) which was password protected and had no clear password listed, and it was the only free one on the list.

Other than that, great ebook op, highly appreciated!

Xylloz - July 26, 2016, 4:57 pm

thanks for the leak dude really appreciated

atEase - July 27, 2016, 6:00 am

So, i read the ebook. It seemed to me as a basic introduction to anonymous web surfing.

It provides a lot of info on apps and websites that can help you surf, text, call and share files anonymously.

It also briefly explains the basics, like VPN (while providing related websites), proxy servers, RATs etc

Overall i think people can gain from it. I would reccoment it to you if you are starting to learn about hacking/web anonymity or if you want to freshen up your knowledge :)

Thank you boogeyman

Gecco123 - July 27, 2016, 5:08 pm

When I saw this thread I thought great, yet another crappy leaked eBook edited to look like he owns it but I was amazed to see a original eBook that The Boogeyman worked hard on. The grammar in this book is on point and the design looks very nice. I highly recommend you PM The Boogeyman immediately before he stops giving out copies.

?eptic - January 29, 2017, 4:53 am

I just finished reading The Boogeyman's eBook. This eBook is perfect for you if you want to know how to stay anonymous, remove your traces, which RAT/Crypter you should use, what Anti-Malware software you should use etc. He basically covers the basics (and more) that you SHOULD know if you want to start your hacking. I highly recommend reading this eBook! Thank you The Boogeyman.

Hi Im Looking to establish a relationship with someone who can teach me about crypto, financial systems, etc, so I can make a start for my self in that world, in exchange I am willing to exchange info and knowledge about python scripting, exploits, bugs, etc and more as I have a degree in cybersec, digital forensics, finding bugs in systems and much more. I beleive such an arrangement can only be beneficial to both parties.

Look forward to hearing from you. and please do send the book. thanks

There are legit ways of making money off of crypto and not so legit ways. ie, coinmining via malicious rigs that suck juice from a victim machine to mine on your behalf. I would watch all the stuff about bitcoin then watch some Youtube cryptotrader videos. You would also do well to have at least 10k capital to begin any kind of crypto trading career. I cant advise on the coinminning part since I never did it, but I have never lost money trading bitcoin; which is entry level. There are lots of coins out there now. -- My two cents.

I would love a copy of your book. Any reason why you arent just posting the book here?
