Thread: [\[Release\] Clean 17502 HV release](#)

thekindguy2 - July 13, 2016, 8:28 am

Hello, fellow chaps and offline people. Today's your special day, due to many of the HV's being 'released' and manually edited on purpose to annoy others and annoying people banning their keyvaults.

So, In light of receiving this type of idiocy, without further ado. I'm here today, to release a fully clean HV for the premium section of Se7ensins. This has been a sponsored release by the Hidd3n Devils group.

Before we start, take a moment to accredit the people that made this happen ([Click to View](#))

- Dwack - For XeDump and the various research he's shared if you listened to what he had to say.
- Chr0m3 x MoDz - For his original thread to help others, even though this information was out there, if you knew it firsthand. Either way, you deserve credit.
- TGK - Various research and the time he took to teach me about how 2210 was supposed to be reversed.
- Fuse - For releasing Oscars KrnlUpd and explaining how to use it.
- Professiona - Just being there to talk to.
- TEIR1plus2 - The release of Xebuildptch to simply XeBuild reverse process.
- oscar193- For making KernelUpd.exe fto update the kernel on the go and that process.
- Credit goes to whomever else I forget.

Please use the threads referenced if you're looking to learn. I would help you, but I'm too busy anymore, and barely around my computer.

bespike - November 18, 2016, 10:52 am

hey could you share Oscars KrnlUpd please?

bespike - November 19, 2016, 10:40 am

thank you :) for this :D ... is the hypervisor been cleaned?

bespike - November 19, 2016, 1:28 pm

yh no worrys, i have dumped hv and cleaned it :D

imageinbox - November 19, 2016, 2:21 pm

?? WoW you're really great!!! Thank You?

SnoWHAX - November 22, 2016, 3:56 pm

teach us to clean the F0 :)

Gassed - November 27, 2016, 3:13 pm

abit outdated now i must say.
