Thread: [Darktrack 4 Alien - Problems](#)

nemesis1618 - July 14, 2016, 8:59 am

1-When i create server with 127.0.0.1 and start server on my pc its working but when i restart my pc my server is crashing. I cant see my pc on connection tab. I do enable startup but its not working after pc restart

2-In my country we using dynamic dns. When i create server for another pc, if i add my dyn ip i take failed error, when i use droidjack i use duckdns acoount and i create my server with my this duckdns account same to darkcoment rat. But i cant do anything for darktrack 'add ip adress' tab. Can anybody help me? Sorry for my bad english ;)

wait for darktrack 5 the coder will fix it
?

nemesis1618 - July 14, 2016, 3:20 pm

good im happy now ?
but when is coming?

jack7076 - September 1, 2016, 11:27 pm

yeah this is really bugging me too if I find a fix I will post it here

Watership - September 1, 2016, 11:33 pm

10-15 attempts to start it or extracting a new dt usually fix crashing and connections not showing bug

Edit: like if you know for sure there's an infected PC but it's not showing in connections just restart idarktrack multiple times until it shows up. Usually, even if you can't see it when you start the program a very brief notification will pop up in the bottom right corner

phageforever - September 1, 2016, 11:35 pm

Startup of darktrack isn't working currently. The coder is working on a fix for it soon.

SIM-3124535 - September 2, 2016, 8:15 am

I have the same issue. Every time my slave restarts his computer he doesn't appear anymore even though I manually added the startup to registry using the registry editor and also to the startup folder and also I checked startup in my crypter and in darktrack.

Restarting DarkTrack 2000 times doesn't help.

Btw I also noticed that when you inject a messagebox into other process the server crashes.

You shouldnt enable startup from both DT and crypter.

Try using only persistence setting in DT and enable Startup and Installation from crypter. And btw what crypter and injection are you using?

neegerniki - September 2, 2016, 9:39 am

Yeah the dt is quite buggy :D but an amazing rat tbh

Yeah, usually, but why's he using a mutex then?
