Thread: [\[All Members\] FREE KIK CRACKER](#)

Woes - July 14, 2016, 6:53 pm

Hey HF, I got this coded like 1 week ago, but I have a mac, and VirtualBox stopped working so I decided to give back to the community!

The cracker works with Bluestacks, and is best when you run it with an older kik version, ([kik history download links here](#)) because the newer kik versions contain Human Verifications.

Oh and after clicking start on the program, click the username box and put the mouse over the login button. (You'll only have 5 seconds to do so before the program starts going!)

[Virus Scan](#)

-

Feel free to vouch on the thread after you get this working.
