Thread: [HOW TO SPREAD RATS + SPREADING METHODS! FAST & EAST](#)

FlyZone - July 14, 2016, 8:34 pm

Welcome And Thanks For Clicking my post!

Here's a Few Tips and Tricks that i used Spreading my rats and getting more "slaves" or clients
Not Saying these will always Work but i Used Them alot! .

SPREADING RATS WITH DIRECT DOWNLOAD LINK!

Go to " Dropbox.com " Make a Acc , (Takes less then a min) Upload the .exe file Once you have the DL Link At the end of your DL URL it should Say something such as " =0" Change that To "=1" Then When someone clicks it, it will automatically download instead of them having to click download!

HOW TO SPREAD RATS TO FRIENDS EASIER!

Learn your victim. Learn what they want and what they like. For example if my friend loves minecraft or there PC Game quit working, Send them a message saying you found a tool that works to repair the broken files or tell them you have a "Sick or Cool" Program / Tool that will benefit them in any way possible but use your brain, around them and get them to open the program. Also i suggest being in a call so its more trusted. For example my friends GTA IV Stopped working and gave him a error message i told him that downloading this tool repaired the files and removed the infected files that are not letting you play the game. He believed me mala. Not hard. Use your smart brain.

HOW I PERSONALLY SPREAD LOTS OF RATS AROUND THE INTERNET.

You know those retarded old videos " FACEBOOK HACKING PROGRAM WORKING 2016 " litteraly copy the video. Go to the url put "SS" before the "youtube.com" and it will download the video. Upload the video to a fake channel update everything (desc) with your download link instead but use mediafire because its trusted but make sure you clean your Download, How to make the video look legit? Go to AMF Or a growing social media website and get likes on the video or just make fake accounts and comment working thanks ! and stuff like that !

BIGGEST WAY I SPREAD BEFORE (INDIAN/FOREIGN CLIENTS)

As as you know theres lots of "thirsty" / horny people on the internet. Go to a online Yahoo Chat select india and go around saying : Add my skype for nudes : with a (girl name) obv. Im telling you know in the matter of one minute you will have 50+ contacts from horny dudes from india. Grab your Virus Link, (dropbox or whatever) make a custom url such as bit.ly [WARNING: potentially infected] go to skype (i suggest using a skype tool) and message all of them saying (heres my slideshow of pics hope you like xoxo (url). Before you ask, will they actually download a .exe file for nudes.

Yes and i find this works 90% more then US users but the only down side is these users hardly have anything good on there pc

EVERYONE WANTS FREE STEAM GAMES! CORRECT?

Once again find a video of getting free steam games or of someone claiming theres a program working copy the video, change URL and click bait the fuck out of it
FREE STEAM GAMES 2016 + MEDIAFIRE DOWNLOAD! (WORKING)
And once again, make a bunch of youtube accounts like it up comment and it should get more attention

What Rats i Prefer:

DarkComet

nJRAT

If You Guys have any questions on how to do anything or questions on the post please reply to it or pm me ! im always active and hope this helped anyone that needed it !

Nightmaree - July 14, 2016, 8:41 pm

dark comet is outdated as fuck.

FlyZone - July 14, 2016, 8:42 pm

i don't spread rats anymore but i used darkcomet. when i did which was around last year.

-_-Error 404-_- - July 14, 2016, 9:44 pm

Using Dropbox as a direct link for your rat isnt the best idea since your file will be distributed to av companies and will become detected by most av's pretty fast.

Also , why use Darkcomet and Jrat ? there are much better rats these days...

Anyway, nice tutorial ... ?

FlyZone - July 14, 2016, 9:59 pm

Yahoo what?

This guide is from early days of internet ?

Stevesmit123 - December 14, 2016, 3:35 pm

Great tutorial but I have a potentially dumb question. If i send the direct download link, let's say from Dropbox, and the user downloads it, does that trigger the RAT/keylogger? Or is it similar to when you send a file via email where you click and download the attachment but have to actually open the attachment for it to execute. Thanks for all the help

sameral3tebe - December 16, 2016, 2:34 am

Good steps but not always work this method

Avira - December 16, 2016, 2:49 am

[color=#FFFFFF]HOW I PERSONALLY SPREAD LOTS OF RATS AROUND THE INTERNET.

You know those retarded old videos “ FACEBOOK HACKING PROGRAM WORKING 2016 “
litteraly copy the video. Go to the url put “SS” before the “youtube.com” and it will download the
video. Upload the video to a fake channel
[/quote]

And here, you gave very bad advice.

RCE - December 19, 2016, 11:50 pm

thanks very mush for sharing this methods ,

TheEnderxHacker - April 7, 2017, 11:42 am

great thanks fam lit i thank you

StubzBK - April 9, 2017, 4:58 pm

anyone have any better alternatives to darkcommet? would really like to know.
thanks

(Oct 20, 2023 06:12 AM)www Wrote: [\[CITE\]](#) which one lad? send me
Pm me on telegrm @[deleted]

unlimitedthoma - December 21, 2023, 8:51 am

Yes games are a good way to do that

apambalik - December 21, 2023, 8:53 pm

Thank you for the tutorial

gegis - January 25, 2024, 11:46 pm

anyone know what rats are good to use today?

Charlie Sheen - January 25, 2024, 11:58 pm

You'd have a lot more luck posting a thread over here in this section - [Remote Administration Tools](#)

By the way, welcome to HackForums. Make sure to read our sites [Help Docs](#).
