Thread: [What are the best booters/stressers out there?](#)

Sandbars87 - July 15, 2016, 1:06 am

Hi everyone.

What are the best and most efficient booters/stressers out there? I want them to hit servers.

Antigua - July 15, 2016, 2:13 am

ip stresser is good you can try it for free but you need to pay for a subscription for more bandwidth

Great question I am going to pay for unlimited use on some of the stressers with my own money will let you know man

Sandbars87 - July 15, 2016, 4:18 am

Thanks for replies.

Ipstresser doesn't seem to hit a server hard enough. I need a paid stresser. (preferably something you have actually made use of, yourselves)

I tested databooter.com (under the username "sandbars"). My experience with them is amazing though.

This website (databooter.com) is a terrible scam. Tested their ddos service on my home-made server and yet, my server is up and running. (absolutely no Ddos protection was implemented for my server)

The reps there have terrible attitude too. He just said: "Did your mom give birth to a bucket of glue"??!!!

It's sad where this old website is headed.

Well, you can take a look at the Server Stress Testing section and look at some reviews and make your own choice from there.

Why do you "specifically" lead me to a "specific" booter?? (While there are too many threads right there touting the same service)

Pluse, I can't seem to be allowed to post anything on those threads. WEIRD.

Hello Sandbars87,

For a stresser I recommend you check out vDos (<https://hackforums.net/showthread.php?tid=5038688&highlight=vdos>). Also if you want something to hit hard I recommend you start learning about botnets and create your own.

It's sad where this old website is headed. I think the issue you're having is called "Client side autism"

I can also vouch for Exo. I personally know the owner and he's the most trusted in the SST market hands down.
