Thread: [How far have you traveled in PokemonGO?](#)

YinYang - July 15, 2016, 2:40 pm

To see tap on your profile in the bottom left, and scroll down to awards.

I have been playing this game on my morning runs, it's doing me good;

Ran 6 and a half miles today, walked about 20 in the past 3 days.

Will hit that 100km soon.

I usually run with [strava](#) and Spotify, but now I cut off Strava and use in built in music player to save battery.

Knucklez. - July 15, 2016, 5:30 pm

Damn man that is pretty impressive. I only have a measly 18.7 km walked in 3 days playing the game. Keep it up!

Grim - July 15, 2016, 5:31 pm

56.5 KM. But also most the pokestops that i go to are really close together so i dont have to walk super far, So are the gyms i go to.

?Saadi - July 15, 2016, 5:34 pm

I've only walked about 10km and driven about 17km (playing Pokemon Go). Haven't got much time lately but will definitely start playing more soon enough.

Pillows - July 15, 2016, 5:35 pm

Dam you're far. I only have 18.5km. But from me just walking, I take that's pretty impressive over the last couple of days.

topdog77 - July 15, 2016, 9:38 pm

I don't know how far I've traveled, but I've traveled at least 50 miles total trying to catch pokemon, yet I have utter crap pokemon atm so I'm going to have to come up with a new strategy T.T.

Wander - July 15, 2016, 9:41 pm

I have only travelled 24.9 according to the game. Most of the time I have been in a car so I reckon +20KMPH are not documented.

Redemption - July 15, 2016, 9:43 pm

I've only traveled 12.9 KM. It seems like every time I'm in my car driving it doesn't pick it up though unfortunately.

Premortal - July 15, 2016, 9:43 pm

I haven't traveled all that far yet, only a little over 50 km. It's mostly because I can just sit in an area where three Poke Stops overlap and leech off of other people's lures. Did this for a few hours the other day on campus when class was cancelled.

Cameron - July 15, 2016, 9:44 pm

I traveled just over 5km so far. I was planning to go out today but the weathers been poop so now I'm just trying to whore for this damn award.

A NEW ERA... - July 15, 2016, 9:52 pm

My girlfriend and I have only gotten around 5 km, but we also haven't played it much so of course we won't have as much as a daily runner.

Krule - July 15, 2016, 9:52 pm

A couple of miles at the most, nothing like burning your fat ass carbs before you come home for dindin ya know

Confound - July 15, 2016, 9:54 pm

Thats actually really cool, I wasn't even aware the app did this. I for sure haven't gotten far yet, but ima hopefully get through a lot tomorrow.

YinYang - July 16, 2016, 4:12 am

I wish I didn't have to have the app open, for evening runs I don't play it, and I recon It would be 100km+

w?????illiam???? - July 16, 2016, 4:19 am

I haven't traveled at all, only tried it a few times outside my house. I haven't had any time to play it because I've just been busy. I'm about to go on vacation in about 5 hours~ on a plane, maybe once I'm on vacation I can try it out more.

BTCEXchangez - July 16, 2016, 4:22 am

Around 30km so far. It's been raining for like 5 days straight here and couldn't be bothered to go outside.

Mr.Peanut - July 16, 2016, 4:23 am

Haven't played that much, maybe a total walking a mile but I plan on playing a bit more now starting today! Gotta get some eggs and other things!

Ninetales. - July 16, 2016, 4:24 am

Closing in on 60KM. I just longboard though, don't have the capacity to run.

DumpCake - July 16, 2016, 4:25 am

I traveled roughly 170KM, I walk quite literally everywhere, including to work and back, playing pokemon just makes it more fun.

Niccolò Machiavelli - July 16, 2016, 4:28 am

I have traveled like 5 miles, nothing special really. I honestly rarely play the game, pretty boring to me. That's just me though, most people love it.

B4ROT - July 16, 2016, 4:29 am

I'm only at 31.2km so far.

I need to get out and go on some more late night walks.

YinYang - July 16, 2016, 4:32 am

Hot damn, what level are you? :D

Fliiix - July 16, 2016, 10:12 am

I traveled about 70km only by walking.

But i will be starting to use my car at night when there is not so many people awake, much more chill and faster.

SIM-403479 - July 16, 2016, 10:13 am

I have traveled around 20km so far.

I have probably traveled a lot more just my phone hasn't been on the game constantly. Regrets.

Senor Suave - July 16, 2016, 11:38 am

I traveled only 11 kilometers in the game. I am too lazy, I only go on trips with my friends and I'll catch with shit by my house.

YinYang - July 16, 2016, 12:12 pm

Up to 85 KM

100km tomorrow?

Wyatt Garcia - July 16, 2016, 12:16 pm

I would check if my fucking game would open, sometimes it just sticks on the Loading...

But I'm not sure, taking a guess maybe about 15-20km

YayHar - July 16, 2016, 12:17 pm

I wouldn't imagine too far, since I don't play it that often. Then again, some people run marathons just to get the most basic shit. idk it's taking over

King of Clubs - July 16, 2016, 12:18 pm

That's pretty sick OP. Let's just say that I'm not even remotely close to that yet.

Too be honest, I don't have that much time to play.

Fantod - July 16, 2016, 12:18 pm

A friend of mine walks to work everyday just to catch pokemon, he livies over a mile away and is going hard on the game. He has 2 Vaporeons, one is 1100 other is 1200, and he has a shitty low cp

Dragonite. Personally, even if i downloaded the game, wouldn't have the motivation to grind the shit out of it to catch up with everyone else, and from what i generally have read, the gyms are controlled by no life nerds who have like 6 1500 pokes.

Monostable555 - *July 16, 2016, 12:22 pm*

I've traveled roughly 15 KM, but the app has only recorded me walking 3 KM. I know I have walked ~15 km since I have walked to and from work which is about 5 there and back about 3 times!
