Thread: [Pokemon GO | Tap To Walk & Location Spoofing | No Jailbreak | OS X Only](#)

funtela - July 15, 2016, 3:14 pm

[New & easier updated version!](#)

This is for those of you who are lazy or are in a condition where you can't move or leave the house. Whether it's a medical reason or not.

-

Caution: I tried this on a secondary account and haven't gotten any bans. But still, there's always a chance. I personally just use this on my second phone to play when I'm bored at home on a secondary account.

Step 1: Download PokèmonGO.ipa first, it must be decrypted a.k.a. "cracked".

Step 2: Download this file and unzip (I recommend you place the unzipped folder onto the desktop):

<http://www62.zippyshare.com/v/Hr9mq9TV/file.html>

Step 3: Place your copy of PokèmonGo.ipa into your previously unzipped folder.

Rename the .IPA to PokemonGO.ipa if you wish to follow the tutorial directly

Step 4: Open up your terminal and type(you need an elevated account for the following steps):

Code `cd Desktop/your-unzipped-file`

You should now be in the folders directory. Next, you must elevate OPTOOL and patchapp.sh

Code `chmod +x patchapp.sh optool`

Step 5: Create your provisioning profile, and locate it in Finder (Details on how to create a provisioning profile can be found [here](#))

Xcode>Preferences>Select your Developer ID>View Details>Locate your provisioning profile>Right-Click>Show in finder

Step 6: type the following into the console, where you should still be in the unzipped file location.

Code `./patchapp.sh patch PokemonGo.ipa` (hit spacebar) (drag your mobile provision in here from your provisioning profile folder)

You can just drag your previously located provisioning profile from the Finder into the Terminal.

Hit Enter

You should see the following:

```
Code [+] Unpacking the .ipa file
(/Users/xxxx/Desktop/JailedPokemonGoanyWhere/PokemonGO.ipa)...
[+] Copying .dylib dependences into ".patchapp.cache/Payload/pokemongo.app"
[+] Codesigning .dylib dependencies with certificate "iPhone Developer: xxxx@xxxx.com
(XXXXXXXXXXXX)"
    .patchapp.cache/Payload/pokemongo.app/PokemonGoAnywhere.dylib
    .patchapp.cache/Payload/pokemongo.app/CydiaSubstrate
    PokemonGoAnywhere.dylib
[+] Patching ".patchapp.cache/Payload/pokemongo.app/pokemongo" to load
"PokemonGoAnywhere.dylib"
[+] Generating entitlements.xml for distribution ID
[+] Codesigning the patched .app bundle with certificate "iPhone Developer: xxxx@xxxx.com
(XXXXXXXXXXXX)"
-n
pokemongo.app: replacing existing signature
[+] Repacking the .ipa
[+] Wrote "PokemonGO-patched.ipa"
[+] Great success!
You should have the "PokemonGO-patched.ipa" located in your unzipped file.
```

Step 6.1: If you are facing an "App Installation failed" error, download [iOS App Signer](#) and drag in the "PokemonGO-patched.ipa" as your "Input File:", and select & find the provisioning profile you used in Step 5. Hit Start and an .ipa should be created on your desktop.

Step 7: Sideload the .ipa that was created on your desktop (if you did step 6.1) or inside your unzipped file.

Enjoy!

[Source](#)

Here's a Youtube guide to follow as well!

minimalist - July 15, 2016, 3:17 pm

Cheating really isn't fun because it ruins the purpose of the game, but I guess if you're sat down in front of a computer that there's no other option.

Good write up.

+Nemesis - July 15, 2016, 3:18 pm

Do you have any Idea if this is possible on Android Devices since the app has spoof locations disabled.

funtela - July 15, 2016, 3:19 pm

I actually just found a Youtube video that's a lot easier to follow since that guide is pretty damn confusing lol. I'll update the OP with it now!

YayHar - July 15, 2016, 3:19 pm

Location spoofers will get you banned really easy, I appreciate the contribution but this isn't a good idea bro.

A NEW ERA... - July 15, 2016, 3:20 pm

You just made this game 900x easier for me than it ever was tbh. You the real MVP for this one Ryan Reynolds.. gotta wait till I get a new phone tho.

funtela - July 15, 2016, 3:20 pm

(Jul 15, 2016 03:19 PM)YayHar Wrote: [\[CITE\]](#) Location spoofers will get you banned really easy, I appreciate the contribution but this isn't a good idea bro.

I know. Which is why I recommend just using this for fun on a second account. I would never do this on my main account lol. I'd hate to get banned.

B?o?s?t?o?n - July 15, 2016, 3:20 pm

I'll do this a little later on once I get home thanks for this

Niccolò Machiavelli - July 15, 2016, 3:27 pm

I'll be sure to try this when I get home to my laptop, thanks for the share Ryan! Looking forward to seeing what I can do lol

funtela - July 15, 2016, 3:28 pm

No problem guys I hope you enjoy! Remember this is only for OS X! You won't be able to do this on a PC unless you have OS X installed on it!

JASON AND MEDEA - July 15, 2016, 3:29 pm

Thanks for providing this tut Ryan, you never fail to please me.

Wings of Redemption - July 15, 2016, 3:30 pm

Also, if you have a jailbroken iPhone you can add the correct repository to download the tweak. It helps a lot since you can tap in any direction to go. Just make sure you don't go all the way across town within 10 minutes because that is sketchy as fuck

10x - July 15, 2016, 3:33 pm

You will get banned very quickly just saying because Niantic has been very quick to ban on ingress Imfao

funtela - July 15, 2016, 3:45 pm

(Jul 15, 2016 03:30 PM)President LBJ Wrote: [\[CITE\]](#) Also, if you have a jailbroken iPhone you can add the correct repository to download the tweak. Yea I know that's true lol. This is for those that aren't jailbroken though. I think you have a less chance of being banned this way.

Gerymc - July 15, 2016, 6:14 pm

Thanks for this :D I'm too lazy to walk lol

???? - July 15, 2016, 6:16 pm

Good write up.

But what if there becomes a market for selling your pokemon for real world cash dollar. I'd rather have that than some short-lived entertainment tbh

Eternal. - July 15, 2016, 6:23 pm

So you basically need a Mac to do this method then, that's a shame. I have an iPhone and a Mac but I think it sucks you have to have a Mac to make this work.

???? - July 15, 2016, 8:26 pm

(Jul 15, 2016 06:23 PM)Eternal. Wrote: [\[CITE\]](#) So you basically need a Mac to do this method then, that's a shame. I have an iPhone and a Mac but I think it sucks you have to have a Mac to make this work.

Yeah I was disappointed by that as well. But I believe that you can get xCode on Windows if I am not mistaken?

Senor Suave - July 15, 2016, 9:29 pm

OS X only, well I do have my PC tri-booted but I don't know if this is that worth it. It is a great find and I appreciate it OP. (Just really commenting for later if I decide I wanna try it out)

Jose"the real 1" - July 15, 2016, 9:31 pm

i don't get all the fuzz about this game, besides that it is boring it makes you even more traceable then u anyways are!

Krule - July 15, 2016, 9:32 pm

It's a shame this is only for OSX. Anyways, good luck to everyone that uses this method. Let us all know how it works!

CasperXN - July 15, 2016, 9:33 pm

I feel this defeats the entire purpose of the game, dulls it down, and makes it completely pointless. If you want to sit down and play a pokemon game, get an emulator and play one of the DS/GB games or something.

Wander - July 15, 2016, 9:33 pm

(Jul 15, 2016 03:14 PM)RYAN REYNOLDS ? Wrote: [\[CITE\]](#) Here's a Youtube guide to follow as well!

Thanks for the share. Might actually try this out since there is no JB.

Fuse• - July 15, 2016, 9:33 pm

Can someone link me to a good tutorial on how to install Mac OS X on a VirtualBox? I've spent the last 5 or so hours just trying to get this PokemonGoAnywhere. Wish I had a Mac...been using Bluestacks the past few days and it's been horrendous.

Confound - July 15, 2016, 9:34 pm

Thanks for this kind of guide dude. That is pretty dope. Ryan always coming in clutch with the amazing guides.

funtela - July 15, 2016, 9:45 pm

(Jul 15, 2016 09:34 PM)Confound Wrote: [\[CITE\]](#) Thanks for this kind of guide dude. That is pretty dope. Ryan always coming in clutch with the amazing guides.

Thanks bro! Just trying to help out those lazy people that don't actually wanna leave the house to capture some Pokemon! :p

topdog77 - July 15, 2016, 9:51 pm

This is cool to have/use, but I agree with other people on this thread, its just not the same if you cheat, this is like the Wii of pokemon if that makes sense lol.

funtela - July 15, 2016, 9:52 pm

(Jul 15, 2016 09:51 PM)topdog77 Wrote: [\[CITE\]](#) This is cool to have/use, but I agree with other people on this thread, its just not the same if you cheat, this is like the Wii of pokemon if that makes sense lol.

Yea I know what you mean lol. This is just to have fun if you're bored at home or something. I never use this on my main account.

Master Bombastic - July 16, 2016, 4:33 am

Anyways to get this to work with android?

DumpCake - July 16, 2016, 4:36 am

Thanks for this, I'll have to try it on my hackintosh. Considering I'm a lazy fucker and can't actually play the game for real.

Gary - July 16, 2016, 4:39 am

Saw the video earlier sucks that it only works on an Apple OS I don't wanna start up a VM cause my laptop can barely handle it.

TheMTGuy - July 16, 2016, 5:25 am

Too bad im at IOS 9.3.2. And they are not planning to release it soon I guess. And maybe they'll wait till ios 10 >.>

SwimmingPool - July 16, 2016, 1:26 pm

Wait till IOS 10? This will be patched soon.

funtela - July 16, 2016, 1:29 pm

(Jul 16, 2016 05:25 AM)TheMTGuy Wrote: [\[CITE\]](#) Too bad im at IOS 9.3.2. And they are not planning to release it soon I guess. And maybe they'll wait till ios 10 >.>

What do you mean? You can do this on iOS 9.3.2 lol. I have it on my other iPhone that has iOS 9.3.2 and it works perfectly with no issues.

SwimmingPool - July 16, 2016, 1:31 pm

I really hope everyone that does this just gets banned. Would be easy for Niantic to do on the server side.

Wyatt Garcia - July 16, 2016, 1:33 pm

Thank you for share, I wont try this but I actually might with my other phone just to see how it is like. I dont wanna do this on my main accoun ttho.

funtela - July 16, 2016, 1:35 pm

(Jul 16, 2016 01:33 PM)Aecy Wrote: [\[CITE\]](#) Thank you for share, I wont try this but I actually might

yea don't do this on your main account lol. I use it on another one just to have fun and trick my friends and stuff like that haha.

Stashyy - July 16, 2016, 1:37 pm

Now all the nerdy kids won't go outside again gg ryan you increased obesity.

Dem?n - July 16, 2016, 1:44 pm

There we go! No exercise at last.

Damn, I almost had lost a whole pound too. Too bad, looks like I'll have to be a fatty.

funtela - July 16, 2016, 1:54 pm

Lol no exercise until you get banned haha. Seriously though only do this when you're bored and can't go out.

Actually play the game the way it's meant to be played.

Infinite' - July 16, 2016, 3:52 pm

Haha cheers for the share! I've been stuck in hospital for 2 days and this has seriously helped ? I feel that if you make your movements as realistic as possible there shouldn't be a reason that you would get caught. Plus I've noticed if you leave him on patrol overnight he does very well in walking small short distances for my eggs to hatch. Unfortunately I was and still am too lazy to make a new/second account but I wouldn't really care if I were to get banned ahaha. This game is really just a pass time and it will probably lose it's spark for me in a week or two.

Also: Used it for about 2-3 days now, gone from level 6-12, walked about 37.54km (hatching lots of eggs with 4 incubators running) and am able to go to Pokestops without leaving the hospital.

funtela - July 16, 2016, 3:54 pm

(Jul 16, 2016 03:52 PM)Infinite Wrote: [\[CITE\]](#) Haha cheers for the share! I've been stuck in hospital for 2 days and this has seriously helped ? yea man the patrol mode is amazing for hatching eggs! I deleted it off my other phone but I might install it again just for fun haha.

Indecisive enough - July 16, 2016, 3:56 pm

Every time I try this the app just crashes on launch. Tried 10 times fuck. I'd pay if someone can get it working

funtela - July 16, 2016, 4:01 pm

(Jul 16, 2016 03:56 PM)Indecisive enough Wrote: [\[CITE\]](#) Every time I try this the app just crashes on launch. Tried 10 times fuck. I'd pay if someone can get it working

Look through the comments in the video I linked. There are answers to that issue there. It happened to me the first time but all I had to do was do the process over again.

I legit tried over 20 times man fuck

Ve7o - July 16, 2016, 4:07 pm

Is there a method to do this on android? I cant find a reliable source. Thanks

Dastoks - July 16, 2016, 4:29 pm

Just wondering, is it possible to do on an android aswell ? if so, that would be sick !
i rather not use the pc, only mobile itself so...

Fiz? - July 16, 2016, 4:30 pm

Thanks for the share Ryan this was pretty cool. Don't think I'm gonna try it though just b/c I don't want to get banned and am having fun going out with friends playing, I'll just stick to popping incense when I'm inside lol

?XiS - July 16, 2016, 4:47 pm

Any one got any idea how to get something similar for Android? I'm sure I could get something if I delve deeper but I can't be bothered.

2Chewz - July 16, 2016, 4:49 pm

It's better just to not get banned. Niantic has experience with script kiddies trying to hack their game, and they are not afraid to ban them either.

funtela - July 16, 2016, 4:52 pm

(Jul 16, 2016 04:47 PM)?XiS Wrote: [\[CITE\]](#) Any one got any idea how to get something similar for Android? I'm sure I could get something if I delve deeper but I can't be bothered.

Yea it needs to be rooted though. I'll write up a tutorial in a bit for you guys if you are interested! Let me know and I'll start.

Morrakiu - July 16, 2016, 4:54 pm

Warning people YOU CAN AND WILL BE BANNED BY CHANGING YOUR LOCATION IN GAME.
Just moving a block or 2 isn't detectable but don't fly to fucking Paris and back in 8 seconds.

Indecisive enough - July 16, 2016, 4:56 pm

(Jul 16, 2016 04:52 PM)RYAN REYNOLDS ? Wrote: [\[CITE\]](#) Yea it needs to be rooted though. I'll write up a tutorial in a bit for you guys if you are interested! Let me know and I'll start.

Yeah post one, I'm about to buy a Samsung galaxy S7 just for this shit.

KAA147 - July 16, 2016, 4:57 pm

This ha nothing to do with this thread but about your youtube comments thread
"If you provide me comments list I'll give you 50 free comments" :)

Morrakiu - July 16, 2016, 4:59 pm

(Jul 16, 2016 04:56 PM)Indecisive enough Wrote: [\[CITE\]](#) Yeah post one, I'm about to buy a Samsung galaxy S7 just for this shit.

You can do this with bluestacks or any other Smartphone emulator on your desktop.

If you google bluestacks you will find the webpage application & its pretty easy to setup

Here is a direct link

<http://www.bluestacks.com/download.html>

?erenity - July 16, 2016, 8:01 pm

Everyone is saying you can be banned, but has anybody actually been banned?

I'd imagine if you didn't spam across the world you would be fine. Making it look natural as if you were driving in a car.

funtela - July 16, 2016, 8:28 pm

New updated version! A lot easier to do haha. Probably can be done in less than five minutes! Enjoy guys. Link is down below!

<https://hackforums.net/showthread.php?tid=5341446>

Laughing Man - July 16, 2016, 8:29 pm

I feel like this will be very easy to see and the Developers may punish people behind it, the servers can detect when someone is moving with or without GPS.

Samesies - July 17, 2016, 12:07 am

This is great, I can make a new account and switch to a team with my friends.

Didn't want to walk around 53 miles again to be level 17, tho I will miss my strong pokemon

HighDeathadder - July 18, 2016, 3:22 pm

I am using Xposed Pokemon and can walk my character using arrow keys and can teleport if I want. I levelled up 8 times yesterday and haven't go any ban yet. (I teleported 5-6 times, small distances)
