Thread: [Unlimited Pokemon incense](#)

Pung0d - July 15, 2016, 3:39 pm

For iOS and Android.

Step 1. Use the incense.

Step 2. When the time is running low on the little timer in the top right corner press the home button

Step 3. Go to date and time, turn off set automatically.

Step 4. Set the time back any amount of time you want,

Step 5. Go back in game and your time on the incense should be replenished.

Step 6. Catch em' all.

It's a gamebreaking bug tbh.

FROM WHAT IM HEARING.

This is only a glitch that extends the animation.

I'm not entirely sure, some say it works, some say it doesn't.

SHIFT? - July 15, 2016, 3:40 pm

I saw people using this yesterday when I was playing, I heard it makes your phone lag.

Goat - July 15, 2016, 3:41 pm

Step 5. Go back in game and your time on the incense should be replenished.

Step 6. Catch em' all.

It's a gamebreaking bug tbh.

If that really works then it's amazing!

Have you personally tried it or is it just a thought/idea you got ?

Scarlett Johansson - July 15, 2016, 3:41 pm

Better use this sort of glitch now before they inevitably apply some sort of patch to the whole thing preventing this from happening.

Lancer of Red - July 15, 2016, 3:41 pm

Is this actually legit? I might try it if I feel inclined to buy some later on tonight; I've already used my free ones and I doubt I'll be within range of more for a while; The EXP curve past 20 is insane.

Mix - July 15, 2016, 3:42 pm

I will be trying this later and if this really works I will fucking love you as it will save me so much fucking time trying to level to get more incense

Yung Metro - July 15, 2016, 3:42 pm

This seems cheap doe I don't like cheating I don't know this might make bigger consequences like getting your account banned right? or no am i wrong

SHIFT? - July 15, 2016, 3:42 pm

Yes it is legit I saw people doing it.

No, it's a video and i put it in words.

<https://www.youtube.com/watch?v=P358eZeFiLA>

Mr. Corleone - July 15, 2016, 3:43 pm

O my fucking god.. I only have 1 incense left, why do I learn about this now..

This will probably get fixed knowing Niantic. It's night but I'm still gonna go out and try this.

Grim - July 15, 2016, 3:43 pm

Dam gonna try this when i go out later tonight. hope it works as i will just keep a permanent incense going. I assume it will be fixed soon though if it does work.

Knucklez. - July 15, 2016, 3:43 pm

It's a gamebreaking bug tbh.

Wow, this is amazing.

Have you tried this with lucky eggs?

lucky. - July 15, 2016, 3:43 pm

Well, this makes me wish I had pokeballs right now. Probably will get fixed within a couple days if word gets around well.

Ace Of Jesus - July 15, 2016, 3:43 pm

Bice share fam, I saw it on youtube ahah. It works on both IOS and Android. Pretty awesome, isnt it? :) holy cow, outside raining like crazy! Lmfao, that is like just ,

Pung0d - July 15, 2016, 3:44 pm

(Jul 15, 2016 03:43 PM)lucky. Wrote: [\[CITE\]](#) Well, this makes me wish I had pokeballs right now. Probably will get fixed within a couple days if word gets around well.

Well its on a youtubers account and he has 300k subs +

So it'll get patched, use it now lmao.

B?o?s?t?o?n - July 15, 2016, 3:45 pm

Can anyone confirm that this works?

The Plague Doctor - July 15, 2016, 3:47 pm

Lmao surprised this works, how did they not see that coming

Grim - July 15, 2016, 3:47 pm

(Jul 15, 2016 03:45 PM)B?o?s?t?o?n Wrote: [\[CITE\]](#) Can anyone confirm that this works?

Just tried it and it worked for me! im gonna try this with an egg as well. thanks op! hope it wont get patched soon but take advantage of it guys

findingnature - July 15, 2016, 3:47 pm

I would do this but last time I changed the date on my phone my iMessages were fucked up for like a week.

sHAY - July 15, 2016, 3:47 pm

Does this work really? If so i know someone that is going to do this tomorrow when i go hunting for them pokemons lol! :pirate;

Pung0d - July 15, 2016, 3:48 pm

(Jul 15, 2016 03:47 PM)SI?? I??D Wrote: [\[CITE\]](#) Just tried it and it worked for me! im gonna try this with an egg as well. thanks op! hope it wont get patched soon but take advantage of it guys

If it works for lucky eggs let me know bro

Dessie - July 15, 2016, 3:48 pm

I will try this for sure, hopefully they will not patch this in a while. I think they will tho, a bug like this will get hotfixed in minutes.

MATT?HEW - July 15, 2016, 3:48 pm

Does this work with lures as well? Because theres so many people near my park that used all their lure last night, and maybe I'll hook them up later .

Pung0d - July 15, 2016, 3:52 pm

(Jul 15, 2016 03:48 PM)MATT?HEW Wrote: [\[CITE\]](#) Does this work with lures as well? Because theres so many people near my park that used all their lure last night, and maybe I'll hook them up later .

Try it out my guy,

Idk the extent to this working and not working so best step is to try that shit out my G.

Cameron - July 15, 2016, 3:52 pm

Has anyone tried this yet and can confirm that it works? If so the game has been changed forever lol. I wonder how long it would be until the creators end up patching it.

Gonna give it a shot anyway when I go out later.

Cryoplex - July 15, 2016, 3:53 pm

Thanks for the bug! Hopefully I'll be able to exploit it before it gets patched. Seattle is full of lures, so I'll just pop an incense and chill at Starbucks for a while.

Pain - July 15, 2016, 3:53 pm

I would try it but I am scared to get banned tbh

Pung0d - July 15, 2016, 3:56 pm

(Jul 15, 2016 03:53 PM)PAIN Wrote: [\[CITE\]](#) I would try it but I am scared to get banned tbh

Well the real question is, if this works on lucky eggs.

Pain - July 15, 2016, 4:03 pm

Confirmed you are likely to get banned GUYS DON'T USE THIS METHOD, SAME PUNISHMENT AS GPS SPOOFING.

ST4RL0RD - July 15, 2016, 4:04 pm

What are the chances of getting caught and later being punished/banned though? I think I'll stick to playing it safe...

BTCEXchangez - July 15, 2016, 4:07 pm

Can anyone confirm that they get Pokemon after extending the time and that it is not just a visual thing?

Targaryen - July 15, 2016, 4:09 pm

This doesn't actually work it's just a visual glitch, the timer for the incense will go up but after 30mins it will just working even if you keep putting the time back.

In?sane? - July 15, 2016, 4:09 pm

Saw this on a video linked on reddit before, hopefully they won't ban people exploiting it since the bug is all on them.

Personally won't be using it since I'm struggling more with Pokeballs than I am finding Pokemans.

th3c0rrupt3d0n3 - July 15, 2016, 4:10 pm

(Jul 15, 2016 04:09 PM)Targaryen Wrote: [\[CITE\]](#) This doesn't actually work it's just a visual glitch, the timer for the incense will go up but after 30mins it will just working even if you keep putting the time back.

Lmao too good to be true.

Mr. Corleone - July 15, 2016, 4:11 pm

(Jul 15, 2016 04:09 PM)Targaryen Wrote: [\[CITE\]](#) This doesn't actually work it's just a visual glitch, the timer for the incense will go up but after 30mins it will just working even if you keep putting the time back.

That makes sense. This was exactly like Cheat engine, it will show you have 9000 credits on Habbo hotel but it's only visual. The server-sided code will stay original.

Targaryen - July 15, 2016, 4:12 pm

(Jul 15, 2016 04:07 PM)Ghost?????? Wrote: [\[CITE\]](#) Can anyone confirm that they get Pokemon after extending the time and that it is not just a visual thing?This is indeed a visual glitch sadly.

Yassuo - July 15, 2016, 4:13 pm

Thanks for this I'm gonna try it out later on

BTCEXchangez - July 15, 2016, 4:15 pm

(Jul 15, 2016 04:12 PM)Targaryen Wrote: [\[CITE\]](#) This is indeed a visual glitch sadly.That's what I thought. I mean how can this work if the game is server sided.

Azurio - July 15, 2016, 4:29 pm

This isn't really working, for example when i use this i cannit use poké s'tops anymire àd when i activate a lure model and i set my time earlier then no pokemons spawn anymire for me but for my friends they do :l

Mr. Corleone - July 15, 2016, 4:30 pm

How did the uploader of this video not test this out fully? I feel like he knew but he still made it for the views and money.

What an asshole.

skelly76 - July 15, 2016, 5:04 pm

Going to try this right now to see if it works. This is a crazy glitch. Give me 30 minutes for my incense to run out lol.

Moxxi - July 15, 2016, 5:10 pm

Does it make the timer infinite? Or do I have to keep changing my date every 30 mins as its running out with each reset

MrARM - July 15, 2016, 5:14 pm

Its going to be patched soon,

i think they did that to avoid load issues because a few million timers can get intense.

labroca - July 15, 2016, 5:16 pm

Has anyone tried to do location hacks yet? It seems like something that could be really helpful for the games.

Krule - July 15, 2016, 5:30 pm

Very nice share. My sister has a jailbroken iOS that tends to help w/ this method. Anything out for android?

Alterations - July 15, 2016, 6:53 pm

Can someone vouch that this works?

Lex - July 15, 2016, 6:54 pm

Still waiting on updates on whether or not this actually works or not. Thanks for the share nonetheless.

???? - July 15, 2016, 6:55 pm

Ridiculous how many exploits there are in this game. It isn't still in beta is it...? They should have these type of things fixed by now...

Casian - July 15, 2016, 6:55 pm

Thanks for this. This will prove to be very helpful ?

Romping - July 15, 2016, 6:55 pm

I'm going to try this out soon, thanks for the post OP. Good luck to everyone else who will try this, hopefully it doesn't get patched any time soon.

Vince - July 15, 2016, 6:56 pm

I'm sure this will be patched next update. Seeming as most here will end up reporting the bug to the devs in hope of a reward or something like that.

N3bco - July 15, 2016, 8:20 pm

Does anyone else find that using these incenses is far less effective than lure models? Anyways I'm trying this out. Thanks for the share!

Wander - July 15, 2016, 8:25 pm

(Jul 15, 2016 08:20 PM)N3bco Wrote: [CITE](#) Does anyone else find that using these incenses is far

less effective than lure models? Anyways I'm trying this out. Thanks for the share!

The only time I found the lure modules better where when two are used together. The incense bring in about one pokemon per 5 minutes for me if I am not moving.

Evanescent - July 15, 2016, 8:27 pm

It's is 100% sure that it's gonna get patched in the next update, it's the old school trick to patch the software license.

I think we should utilize the opportunity before it's too late.

Sorun - July 15, 2016, 8:46 pm

Loads of people been reporting this as server side. Tried it myself last night and the timer was still up but it had no effect so i'm not sure.

Krule - July 15, 2016, 8:48 pm

Very nice method, if I do say so myself. Thanks for sharing this with us, OP. I will deffo put this to goooooood use.

Wander - July 15, 2016, 8:49 pm

(Jul 15, 2016 03:39 PM)Nostalgia? Wrote: [\[CITE\]](#) For iOS and Android.

Step 1. Use the incense.

Step 2. When the time is running low on the little timer in the top right corner press the home button

Step 4. Set the time back any amount of time you want,

Step 5. Go back in game and your time on the incense should be replenished.

Step 6. Catch em' all.

It's a gamebreaking bug tbh.

Thanks for the share, going to try this out after I get another from leveling up.

TheFiddler - July 15, 2016, 8:50 pm

Thanks for this, this is an awesome bug if it still works. Im sure Niantic will have it fixed in no time as this can clearly break the game!

Sorun - July 15, 2016, 8:51 pm

(Jul 15, 2016 08:50 PM)TheFiddler Wrote: [\[CITE\]](#) Thanks for this, this is an awesome bug if it still works. Im sure Niantic will have it fixed in no time as this can clearly break the game!

Pretty sure they're more worried about the servers lagging all the time. lol

Telstra - July 15, 2016, 8:52 pm

Cheating in something like this definitely goes against what I believe in.

Train and use your stuff properly in my opinion.

N3bco - July 15, 2016, 8:52 pm

(Jul 15, 2016 08:46 PM)Sorun Wrote: [\[CITE\]](#) Loads of people been reporting this as server side. Tried it myself last night and the timer was still up but it had no effect so i'm not sure.

I'm using it right now and I don't think it's working. I still have the animation and timer yet no pokemon are coming. Has this worked for anyone?

Ooze - July 15, 2016, 8:52 pm

IM worried they might crack down on this and ban users who do this

Thats the only thing holding me back

Sorun - July 15, 2016, 8:54 pm

(Jul 15, 2016 08:52 PM)N3bco Wrote: [\[CITE\]](#) I'm using it right now and I don't think it's working. I still have the animation and timer yet no pokemon are coming. Has this worked for anyone?
Yeah i'm really thinking this is placebo. Most likely server sided.

CheGuevara? - July 15, 2016, 10:02 pm

This is probably server sided. As Sorun above me stated. I don't believe it will work, feel free to try it out though!

?erenity - July 16, 2016, 7:31 pm

If this works with incense, wouldn't it work with Lucky Eggs?
If not, I'm pretty sure this is server sided and the placebo effect.
Either way, not going to work for long.

DumpCake - July 16, 2016, 7:40 pm

It doesn't work, it just extends the animation on your side, since the eggs and incense are all server sided. Thanks for trying though OP.

labroca - July 16, 2016, 7:42 pm

Holy sh-t f-ck this actually is working my friend. Thank you!

D4WID - July 16, 2016, 7:48 pm

I've tried it before I can confirm that it doesn't work. First 30 min of my incense tons of Pokemon came up. Then when I set the time no Pokemon came up at all so I think it's just the animation that gets extended

Djlatino - July 16, 2016, 8:13 pm

Animation looks to be extended, no go on my site.

Get it, no go. Hah.

sphegoon - July 16, 2016, 10:22 pm

Wouldn't this work for the lucky eggs too?

Expels - July 16, 2016, 10:29 pm

This is kinda convenient, however will this work on Android? Or is this something that's iOS specific. How long until the patch arrives?

Dastoks - July 16, 2016, 10:47 pm

Android user here, but im sure its just client sided, dont believe server could be THAT easily manipulated .. think about it its so easy ive done it in ipod 3 games.. so now?

GrandpaSherman - July 16, 2016, 10:48 pm

I will attempt this later and on the off chance that this truly works I will fucking love you as it will spare me so much fucking time attempting to level to get more incense

Juicy - July 16, 2016, 10:54 pm

If this actually works that would be awesome. I'll probably give this a try as soon as I get another incense. Thanks a ton for the tip dude

Vibe - July 16, 2016, 10:55 pm

(Jul 15, 2016 03:40 PM)SHIFT? Wrote: [\[CITE\]](#) I saw people using this yesterday when I was playing, I heard it makes your phone lag.

if you're a droid fan you're phones lagging either way ?

But this is cool didn't know about it, wish I had one left :(

Hern - July 16, 2016, 10:56 pm

I will give this a try later, I can see it working but getting patched soon.

TBH though, when I am downtown everyone has lures anyway so not a huge deal but for those that live out in the middle of no where it might help?

Backopy - July 16, 2016, 10:56 pm

I heard it doesn't work with iOS and only works with the Android first version (that was released two days ago) - damn, I always miss the boat on good stuff..

.wizard - July 17, 2016, 3:15 am

Just tested it, it works, but it is definitely server sided, been 30 minutes and no pokemon have showed up.

TheMTGuy - July 17, 2016, 3:24 am

I've used this method before. On release date and days after it worked but right now I can't seem to let it work anymore. Guess it's random for everyone.

The Kramer - July 17, 2016, 5:00 am

Haven't read the other responses about this but this doesn't work for me on iOS, the incense is still there but it doesn't actually attract any pokemons.

Corpse - July 17, 2016, 5:02 am

I knew it was going to be this method. It technically does extend the time but you will NOT catch any additional pokemon from that extended time.

Ash™ - July 17, 2016, 5:05 am

Definately gonna try this when I get an incense to use

Windows - July 17, 2016, 5:10 am

Good find if this actually works man, going to try it later on today.

It will probably get patched soon. But I don't have any more incenses.

Tymbot - July 17, 2016, 5:20 am

Can anyone Verify if this still works?

murt - July 22, 2016, 1:01 am

It works but it's client side, I csn edit the timer to 999999 minutes ans it works but only for your client so it's just a ghost

c3fc - August 5, 2016, 1:42 am

it also works me the new update?

Hackyr - August 5, 2016, 1:49 am

Just to clarify things.
