Thread: [Preview: Devil Crypter | Immortal Persistence | Stable | Very Cheap | Video Preview](#)

_Devil - July 16, 2016, 9:23 am

Update : 10/3/2016

Finally on Sale : <https://hackforums.net/showthread.php?tid=5423090>

Update : 7/20/2016

[Video: <https://vimeo.com/175507899>]

Apply for Beta Testing : <https://hackforums.net/showthread.php?tid=5345133>

Devil Crypter is a crypter written in C#. The focus of Devil Crypter is having a strong USG algorithm and FUD results Scantime & Runtime. But the main part I would like to focus on would be stability and Very strong Persistence so that it can give a good execution rate and Protection from getting it removed from PC.

What I am working on:Anti Memory Scanner (almost done)

System-Wide Injection

USG (More Improvement Required)

USG features:Junk code generator

String encryption

Flow Obfuscation (creates 90% different stubs)

Encrypt Resource

Other features:Injection Persistence

Startup Persistence

System-Wide Injection (Will Prevent installed file from getting removed)

.NET support & Native Support

Delay Execute

Custom Injection

Anti-Memory Scan

Advance Binder

Antis

Disablers

Custom Encryption

Compression (2 Methods)

Advance StartUp

Protect Process

Many Spreaders

Fake Message

Extension Spoofer

Icon Changer

Assembly Cloner

ZonerID Remover

Multiple Stub

Many more...

Screenshots:

Spoiler [\(Click to View\)](#)

Hoping to see more suggestions and ideas from you, also for pricing as well.

Mitlar - July 16, 2016, 9:31 am

I suggest testing the runtime results and pricing it from their.

Looks good so far...

Prices:

\$30 a month

\$50 3 months

\$70 6 months

If you want to make more money I suggest lowering the prices from the ones I suggested.

_Devil - July 16, 2016, 10:09 am

(Jul 16, 2016 09:31 AM)L????? Wrote: [\[CITE\]](#) I suggest testing the runtime results and pricing it from their.

Prices:

\$30 a month

\$50 3 months

\$70 6 months

If you want to make more money I suggest lowering the prices from the ones I suggested.

I am planing to get some Beta Testers to Check it out with some AV.

and the Price I got in mind:

16\$ a month

35\$ 3 month

55\$ 6 month

_Devil - July 16, 2016, 10:24 am

(Jul 16, 2016 10:16 AM)L????? Wrote: [\[CITE\]](#) Looks good

Also thank you very much for your input. ?

h4ck3rs4l1f3 - July 16, 2016, 10:26 am

(Jul 16, 2016 10:09 AM)_Devil Wrote: [\[CITE\]](#) I am planing to get some Beta Testers to Check it out with some AV.

and the Price I got in mind:

16\$ a month

35\$ 3 month

55\$ 6 month

I would love to become a Beta Tester.

Also those prices are pretty nice.

Good luck.

Have a nice day. ?

EDIT:

What about a icon cloner that can clone the icon of any file?

aesad - July 16, 2016, 10:28 am

(Jul 16, 2016 10:09 AM)_Devil Wrote: [\[CITE\]](#) I am planing to get some Beta Testers to Check it out with some AV.

and the Price I got in mind:

16\$ a month

35\$ 3 month

55\$ 6 month

You should make:

25\$ / month

40\$ / 3 months

65\$ / 6 months

Looks good.

PS: If you are looking for beta tester, lmk.

Nick (Name) - July 16, 2016, 11:36 am

If you're going to have .NET support you should at least have processes that are .NET to object into

such as RegAsm. Also, I'm not sure how Sleek. did this, but his crypter has a reflection injection method, I suggest looking into that, when I used that it seemed to help bypasses memory scanners.

memesaregreat - July 16, 2016, 11:49 am

The theme for the program seems kind of generic. Also, I could probably make a thread design for this crypter.

_Devil - July 16, 2016, 12:01 pm

(Jul 16, 2016 10:26 AM)h4ck3rs4l1f3 Wrote: [\[CITE\]](#) What about a icon cloner that can clone the icon of any file?

sounds good, I might add it in future Updates

(Jul 16, 2016 11:36 AM)Nick (Name) Wrote: [\[CITE\]](#) If you're going to have .NET support you should at least have processes that are .NET to object into such as RegAsm. for .Net files I already have 2 injections Method

- 1) Self Injection
- 2) Managed Runpe (Invoke)

second method is simile to what you are talking, it invokes entryptpoint of the assembly in new appdomain.

(Jul 16, 2016 11:49 AM)memesaregreat Wrote: [\[CITE\]](#) The theme for the program seems kind of generic. Also, I could probably make a thread design for this crypter.

thanks for the offer, Will contact you if I need any help.

I will soon Post some Videos where I will demonstrate different features.

- 1) Working Spreaders
- 2) Persistence + System-Wide Injection (Makes the file very hard to kill for a normal user)
- 3) Anti-Memory Scan and some other features.

h4ck3rs4l1f3 - July 16, 2016, 1:49 pm

- 3) Anti-Memory Scan and some other features.

Sounds awesome.

What do you mean with "Working Spreaders"?

Do they spread it for you or what?

(sorry if it's a dumb question, Just curious)
Thanks in advance.

Have a nice day. ?

_Devil - July 17, 2016, 12:19 am

Have a nice day. ?
yes it auto spreads for us ?

TheTwitchTerror - July 17, 2016, 12:31 am

Good luck with these crypter seems interesting GLWS in future :)

ForceJew - July 17, 2016, 1:48 am

Looks very nice glws!
Hope it will be fud:)

_Devil - July 17, 2016, 4:37 am

working on system-wide Injection
Will post video once its ready.

h4ck3rs4l1f3 - July 17, 2016, 5:46 am

(Jul 17, 2016 12:19 AM)_Devil Wrote: [\[CITE\]](#) yes it auto spreads for us ?
WoW!
Great work!
Again would love to be a Beta Tester.
Thanks in advvance.

Have a nice day. ?

iLogic™ - July 17, 2016, 7:09 am

Have you thought about coding native crypter and about usage of custom (or private) theme?
Anyways good luck with it ?

Sick - July 17, 2016, 8:04 am

Looks very nice posting here to keep an eye on this post !!
Good luck with sales OP but it does look nice

“Adapt what is useful, reject what is useless, and add what is specifically your own.”

xMrTechnox - July 17, 2016, 11:09 am

Wow! Well done brother, I hope it's going to work out for you. Although you should put decent prices. :p

_Devil - July 17, 2016, 11:30 pm

(Jul 17, 2016 07:09 AM)iLogic™ Wrote: [\[CITE\]](#) Have you thought about coding native crypter and about usage of custom (or private) theme?

Anyways good luck with it ?I have used the same theme with my Logger also and its a bit moded.
also I am not that good with C++ so decided to go with C#

(Jul 17, 2016 07:54 AM)TTiger Wrote: [\[CITE\]](#) Good luck man. You are more than capable of making this the best crypter on the market.Thanks buddy

System-wide Injection is ready and will be posting a Video today showing it in action.
Its almost impossible to end the process from task manager for normal users ???

h4ck3rs4l1f3 - July 18, 2016, 2:30 am

I have not yet started looking for beta Testers but I will soon start as I am done with the testing myself. ?

Vuln - July 18, 2016, 6:57 am

What's the point of offering an AutoIT stub if I may ask?

Slavoj Žižek - July 18, 2016, 7:22 am

what method(s) does the anti memory scan use?

and does the anti mem scan support managed files?

also system wide injection is pretty cool but its extremely detected at runtime

finally the spreaders are useless as USB has been patched years ago

(Jul 18, 2016 06:57 AM)Jailbyte Wrote: [\[CITE\]](#) What's the point of offering an AutoIT stub if I may ask?

if anyone wants a native stub?

h4ck3rs4l1f3 - July 18, 2016, 7:29 am

What if you would set a delay for the "system wide injection"?

Shouldn't that get rid of it? (partially)

MrKebab - July 18, 2016, 7:52 am

(Jul 18, 2016 07:29 AM)h4ck3rs4l1f3 Wrote: [\[CITE\]](#) What if you would set a delay for the "system wide injection"?

No, a delay wont help at runtime at all.

Only antivirus delay works against is Avast DeepScreen. But in the end it wont matter because it will be uploaded to CyberCapture anyways.

As soon as you inject in to processes like Explorer almost every antivirus will destroy you. Explorer is one of the worst processes to inject in to.

So as long as you avoid injecting in to that one, you should be fine. Svchost is also detected by some but not as many as Explorer.

For the record, using delay on your crypter is really lame. You should be able to bypass without.

h4ck3rs4l1f3 - July 18, 2016, 8:02 am

(Jul 18, 2016 07:52 AM)MrKebab Wrote: [\[CITE\]](#) No, a delay wont help at runtime at all.

However i do agree with you that system wide injection is/can be a bad idea..

So unless he elaborates how his "system wide injection" works, I'm unable to give a proper answer.

Vuln - July 18, 2016, 12:54 pm

(Jul 18, 2016 07:22 AM)Blezzedd Wrote: [\[CITE\]](#) finally the spreaders are useless as USB has been patched years ago

You mean only the USB spreader. All other ones are fine.

(Jul 18, 2016 07:22 AM)Blezzedd Wrote: [\[CITE\]](#) if anyone wants a native stub?

VB6 can be compiled natively already, so why would you want an AutoIT stub as well?

aesad - July 18, 2016, 2:54 pm

Your persistence could be killed easily.

iLogic™ - July 18, 2016, 11:49 pm

(Jul 18, 2016 12:54 PM)Jailbyte Wrote: [\[CITE\]](#) VB6 can be compiled natively already, so why would you want an AutoIT stub as well?VB6 is already dead but AutoIT isn't.

_Devil - July 19, 2016, 12:37 am

and does the anti mem scan support managed files?

also system wide injection is pretty cool but its extremely detected at runtime

finally the spreaders are useless as USB has been patched years ago

Anti-memory Scan works on debug process method

not yet , still working out for it

nop , mine is FUD ?

USB spreaders is patched but you can surely fool normal users like : shortcut method ?

(Jul 18, 2016 12:54 PM)Jailbyte Wrote: [\[CITE\]](#) VB6 can be compiled natively already, so why would you want an AutoIT stub as well?vb6 is small in size but outdated

AutoIT is big in size but currently used.

I will add any one of them first to test out and depends on How it goes I will add other one.

(Jul 18, 2016 02:54 PM)aesad Wrote: [\[CITE\]](#) Your persistence could be killed easily.Anything Can be killed by an experienced user, but we are focusing normal users here so we are making it almost impossible to kill for them using Task-manager.

DeluxeSoftware - July 19, 2016, 12:59 am

I am offering myself to review your crypter. I would do some runtime tests too.

Crimi123 - July 19, 2016, 1:27 am

If you are looking for some Beta tests I can also do some legit reviews.

Slavoj Žižek - July 19, 2016, 2:48 am

(Jul 18, 2016 12:54 PM)Jailbyte Wrote: [\[CITE\]](#) You mean only the USB spreader. All other ones are fine.

did they not use vb6 to build the pyramids? ?

Vuln - July 19, 2016, 5:19 am

Good luck with your project. Looks promising.

(Jul 18, 2016 11:49 PM)iLogic™ Wrote: [\[CITE\]](#) VB6 is already dead but AutoIT isn't. So what?

(Jul 19, 2016 12:37 AM)_Devil Wrote: [\[CITE\]](#) I will add any one of them first to test out and depends on How it goes I will add other one.
Fair enough. No need for both of them though.

(Jul 19, 2016 12:37 AM)_Devil Wrote: [\[CITE\]](#) Anything Can be killed by an experienced user, but we are focusing normal users here so we are making it almost impossible to kill for them using Task-manager.

"almost impossible to kill for them using Task-manager" isn't exactly hard to achieve, considering you can't even suspend processes or kill multiple ones at the same time with just Task Manager. So "Immortal Persistence" is a bit exaggerated, which might bite you in the ass later.

(Jul 19, 2016 02:48 AM)Blezzedd Wrote: [\[CITE\]](#) did they not use vb6 to build the pyramids? ?
I think they did, yes. But at least those pyramids aren't so freaking huge. Oh, well, at least not as big as AutoIT pyramids.

MrKebab - July 19, 2016, 6:32 am

I'd take vb6 stub over autoit stub ANY day.

Skyrim Modding - July 19, 2016, 7:35 am

Would gladly be a beta tester! Looks really nice

_Devil - July 20, 2016, 1:37 am

Updated the thread with video preview about Persistence and System-Wide Injection.

Snubb- - July 20, 2016, 8:57 am

Applied for beta. Thanks for the Devil Logger btw, really appreciate it :)

_Devil - July 21, 2016, 10:14 am

thanks for your interest , will inform you soon.

yotoprules - July 21, 2016, 12:44 pm

Looks like a very nice crypter! Does it bypass runtime?

_Devil - July 21, 2016, 11:22 pm

(Jul 21, 2016 12:44 PM)yotoprules Wrote: [\[CITE\]](#) Looks like a very nice crypter! Does it bypass runtime?

from the basic testing I have done, yes it does bypass Runtime,
Yet to do advance testing with Beta Testers.

Di3M0nD - July 22, 2016, 10:07 am

Looks awesome to me :D...Good luck!..

maldev0 - July 24, 2016, 5:07 am

Anti Memory Scan is a complex procedure to be honest. And from my knowledge a proper anti memory scan is not possible from usermode, especially not in .NET

_Devil - July 24, 2016, 9:27 am

(Jul 24, 2016 05:07 AM)ArtificialIntelligence Wrote: [\[CITE\]](#) Anti Memory Scan is a complex procedure to be honest. And from my knowledge a proper anti memory scan is not possible from usermode, especially not in .NET

I think you should Increase your knowledge, Its 2016 and almost everything is Possible. ?

There are around 2 or 3 Anti-Memory Scan module Available on HF.

On of the Best if you can pay : <https://hackforums.net/showthread.php?tid=5315407>

MrKebab - July 24, 2016, 6:21 pm

Wut? I coded an anti memory over a year ago. Still works fine... You have no idea what youre talking about.

Complex? Thats ridiculous. Super easy to code :)

Skyrim Modding - July 24, 2016, 7:28 pm

Asked you twice for beta application, no response thanks anyways

innocenthacker803 - July 24, 2016, 9:46 pm

Looking good, keep the prices lower at start

Essence - July 24, 2016, 9:55 pm

(Jul 16, 2016 10:09 AM)_Devil Wrote: [\[CITE\]](#) I am planing to get some Beta Testers to Check it out with some AV.

and the Price I got in mind:

16\$ a month

35\$ 3 month

55\$ 6 month

Well if it's going to be that cheap you will have to refud like everyday or crypter won't be scantime or runtime FUD.

_Devil - July 28, 2016, 1:23 am

(Jul 24, 2016 09:55 PM)OhEssence Wrote: [\[CITE\]](#) Well if it's going to be that cheap you will have to refud like everyday or crypter won't be scantime or runtime FUD.

Its not the final Price, I am still taking suggestions on it ?
