Thread: [Gif not moving](#)

spooky hacker - July 16, 2016, 11:24 am

I don't know how else to explain this but my sig isn't moving. Can anyone help me? I'm currently using this code:

Code

```
[url=https://hackforums.net/showthread.php?tid=5340286][align=center][img]https://media.giphy.com/media/3o72EWqlrUTr18CYzC/giphy.gif[/img]][/align][/url]
```

And the extension of the image is .gif. Even when I try to open the original image on my pc it doesn't move.

Regards,

Daddy???????????? - July 16, 2016, 11:27 am

Regards,

It works fine on my side, but it just doesn't loop itself it seems, plus it wasn't that big of an animation so I wouldn't really care for it.

Omoi - July 16, 2016, 11:31 am

Its not on a loop and such a small animation.

pissedaf - July 16, 2016, 12:43 pm

fixed it for you

M?xim - July 16, 2016, 1:12 pm

You should remove the background image and replace with a rectangle of the hexadecimal code#333333 to make it look transparent. Would look pretty neat then.

When you save it make sure you have it to loop on "Forever." You can see this option at the bottom right hand of the "Save For Web" screen near where the play buttons are.
