Thread: [Pokemon Go++ New Updated GPS Spoofer! | OS X Only](#)

funtela - July 16, 2016, 8:21 pm

Steps for this are 100x easier than my last tutorial lol.

This is for those of you who are lazy or are in a condition where you can't move or leave the house. Whether it's a medical reason or not.

-

Caution: I tried this on a secondary account and haven't gotten any bans. But still, there's always a chance. I personally just use this on my second phone to play when I'm bored at home on a secondary account.

Step 1) Download [ppsideloader](#)

Step 2) Download [Pokemon Go++](#)

Step 3) Unzip ppsideloader

Step 4) Rename the hacked Pokemon app to "app.ipa"

Step 5) Drag and replace the file into the ppsideloader folder

Step 6) Open the ppsideloader folder and double-click to open the "ppsideloader.xcodeproj" file with Xcode

Step 7) Under "Team" choose your Apple ID or login or create one if you haven't. If you see any errors, just click the "Fix issue" button.

Step 8) Connect your phone and choose it on the top left of the Xcode application and press the play button. This will install PokemonGo++ on your phone!

Step 9) Go to the setting on your iPhone and go to "Device Management". Choose your Apple ID and choose to trust it.

Open PokemonGo++ and Enjoy!

Creating a free Apple developer account

Spoiler ([Click to View](#))

Step 1: Visit developer.apple.com

Step 2: Click Member Center.

Step 3: Sign in with your Apple ID.

If you already have an Apple ID, you'll just need to agree to Apple's Developer Agreement to turn it into a free developer account. Type in your Apple ID and click Sign In.

If you don't already have an Apple ID, you'll need to create one first. Click Create Apple ID, and fill out the required information and click Continue. You'll then need to sign in with the Apple ID that you just created, and go back to the Member Center.

Step 4: On the Apple Developer Agreement page, click the first check box to accept the agreement and click the Submit button.

Your Apple ID now works as a free developer account!

Indecisive enough - July 16, 2016, 8:43 pm

Anyway to bypass this?

<https://gyazo.com/054b88460e006c7a8de7a2c239e665cf>

Will it work if I try another Apple ID?

Yup! Just use another Apple ID and it'll work :)

Also, make sure your deployment target is your current iOS version. That's really important.

New Apple ID isn't working.

Its giving me this error

<https://gyazo.com/c8174381b000d768c71c22df331920ff>

JASON AND MEDEA - July 16, 2016, 8:54 pm

Thanks for this Ryan. Gonna check it out very soon! ?

funtela - July 16, 2016, 8:59 pm

Follow this method that's for Snapchat++, but instead just copy the hacked Pokemon app. It's the same steps and he explains all of the errors :)

Indecisive enough - July 16, 2016, 9:03 pm

That wont help man, watched that. Its the build identifier part thats fucking me up.

Backopy - July 16, 2016, 9:04 pm

Any idea when it'll be on Windows at all? This looks so awesome, can't wait to try it out once a windows version comes out!

Indecisive enough - July 16, 2016, 9:09 pm

Okay now it wont install because it says it wont reach the development target

<https://i.gyazo.com/2e5c864a656f3df5d39b6e74a7f8faef.png>

Getting this error, I'm on IOS 10 Beta 2

To recreate a "dev" ipa so to speak, xcode is required. So, unless Apple wants to make xcode for PC, nah.

Indecisive enough - July 16, 2016, 9:13 pm

If someone can help me with this id appreciate it

Ohh if you're on iOS 10 then you'd need the new Xcode beta in order for it to be compatible bro. At least that's from what I've heard.

Man I'm on the fucking Xcode Beta man what the fuck.

Acceptable - July 16, 2016, 9:24 pm

I was just following the same tutorial. Off to area 51 now. I'm too lazy to walk outside and I was walking around yesterday but only managed to catch some shitty pokemon.

I live in a fairly rural area and there's literally only Pidgeots here.

Confound - July 16, 2016, 9:31 pm

Hey thanks for this updated guide. Ryan coming in clutch with some great ways to manipulate the game. While I don't love the idea of changing the purpose of the game, its still clearly beneficial for those that can't get out and play for what ever reason. Thanks

?erenity - July 16, 2016, 10:27 pm

I don't think he created it, it's been released well before he posted these threads. Nevertheless, he did share it here for the community.

Confound - July 17, 2016, 10:23 am

Ive got a question about this. For team, it says I need an apple ID of a developer. How do I bypass that?

funtela - July 17, 2016, 10:47 am

Sorry I forgot to mention that lol.

Creating a free Apple developer account

Step 1: Visit developer.apple.com

Step 2: Click Member Center.

Step 3: Sign in with your Apple ID.

If you already have an Apple ID, you'll just need to agree to Apple's Developer Agreement to turn it into a free developer account. Type in your Apple ID and click Sign In.

If you don't already have an Apple ID, you'll need to create one first. Click Create Apple ID, and fill out the required information and click Continue. You'll then need to sign in with the Apple ID that you just created, and go back to the Member Center.

Step 4: On the Apple Developer Agreement page, click the first check box to accept the agreement and click the Submit button.

Your Apple ID now works as a free developer account!

Confound - July 17, 2016, 12:23 pm

I just did that, yet I still can't get passed that with the developer account. It doesn't seem to register as a developer account, even though I followed your steps to do so. Not sure whats wrong, but if you could help that'd be great. Id like to play today without having to go outside.

urls - July 17, 2016, 12:31 pm

GPS spoofing is so fucking laggy it would almost be easier just to go outside also pretty easily detectable.

xahx - July 17, 2016, 12:51 pm

There is a youtube video on this just search: "How to create a free Apple Developer account for Xcode" it wont allow me to post links yet

Pung0d - July 17, 2016, 7:29 pm

I'm getting this error Idk what to do now :(
pls help

I THINK I FIXED IT

Did you fit it? Let me know if you did or not. I'll be more than happy to help you out brother! Just hit me up and shoot me a PM if you are having any trouble at all :)

#Skyline - July 17, 2016, 8:08 pm

Thank you for the share ryan, this is very handy tutorial and spoofer.
It will defiantly benefit me with using this.

3verywher3 - July 17, 2016, 11:47 pm

Got it working, but the tap to walk seems so glitchy I cant control where I walk at all really

xahx - July 19, 2016, 7:20 am

(Jul 17, 2016 11:47 PM)3verywher3 Wrote: [\[CITE\]](#) Got it working, but the tap to walk seems so glitchy I cant control where I walk at all really
seems like u cant get a free developer account anymore, how did u get passed this?

Confound - July 19, 2016, 7:31 am

I have to say there are easier ways of getting Pokemon Go++ than this method. I found this one really hard, and seems like the spoofer makes it laggy and also a lot more prone for a ban. But that said, still clearly a great resource.

xahx - July 19, 2016, 7:50 am

Could you share an easier method ?

Roytoy - July 19, 2016, 7:56 am

Thanks Ryan once again for the great tutorial.
I wonder how long it's going to take me to try this out.
Thank you nonetheless.

3verywher3 - July 20, 2016, 10:39 am

(Jul 19, 2016 07:20 AM)xahx Wrote: [\[CITE\]](#) seems like u cant get a free developer account anymore, how did u get passed this?
You can get a free developer acc just sign in with your itunes acc
