Thread: [\[FREE\] Darktrack Setup Guide \[VPN+DNS included\] DarkFedora + FagDns](#)

Klima - July 17, 2016, 10:37 am

Hello HF fellows ?

This is a FREE Guide for the free rat DarkTrack Developed/Coded By Luckyduck in Delphi.

This Guide includes a complete free setup by using the free vpn DarkFedora (or not, as you want) and the free dns FagDns.

Of course, this guide is for educational purposes only. I repeat, It's for educational purposes only !

Let's Start !

Step 1: Downloading all the softwares

Download DarkTrack Alien from the official Website -- [Darktrack.net](#)
pass:dt94

Download DarkFedora from the official website (Or download the configs if You're using OpenVpn)
-- [darkfedora.com](#)

Setup a dns via FagDns -- [fagdns.su](#)

Step 2: Open DT and select a non chosen/popular port with a password for the rat's port -- That you'll portforward to your Vpn

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

Step 3: Setup your free vpn (DarkFedora) and portforward it to the port you just select in DT, All the How to are in this thread :

<https://hackforums.net/showthread.php?tid=5292401>

Step 4: Setup the FagDns with the vpn's Ip, make sure you keep the fagdns's token just for you or someone can just delet it. Download the Fagdns update for the website itself and update like every 5-10 minutes.

Spoiler [\(Click to View\)](#)

Step 5: Get back to Darktrack and open the create server option and add a profile, name it whenever you want. Double click on it and add an ip adress as the pictures

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

Step 6: Enter the fagdns domain you created that is linked to your vpn's ip. On the right enter the port you chose on Step 2 and the password too.

Spoiler [\(Click to View\)](#)

To see if you did all right, select test ALL IP'S -- normally it should say works!

Spoiler [\(Click to View\)](#)

Step 7: Now it's time for the crypting options

For this step, I'll let you guys see the complete How to crypt DarkTrack thread By L????? --

<https://hackforums.net/showthread.php?tid=5326211&highlight=darktrack>

Step 8: When you click on that build server, the server will directly go on the DarkTrack folder right here.

Spoiler ([Click to View](#))

Step 9: Enjoy the Free complete Setup :D

I repeat, this guide is for educational purposes only. I'm not involved in your actions ?

Have a good day guys, this was my first Guide, let me know if you find it useful ?

Purple Kief - July 17, 2016, 10:42 am

The images aren't showing.

You have to upload them to imgur.com and then use the [IMG][IMG] option they give you.

yotoprules - July 17, 2016, 10:43 am

The images are broken, and DarkFedora port forwarding does not work for me, if you could help me with that that would be great! otherwise great thread!

Klima - July 17, 2016, 10:44 am

I just pmed you and thanks for the feedback ?

bzr? - July 17, 2016, 2:37 pm

Nice tutorial. More the merrier ?

h4ck3rs4l1f3 - July 17, 2016, 2:50 pm

Great tutorial.

This will help some people, I'm sure!

Have a nice day. ?

Thank you Sir, hope it'll help some people too ?

Pharaoh1100 - July 17, 2016, 3:08 pm

Great guide!

Kudos to OP for contributing to the community.

Armada - July 17, 2016, 3:09 pm

Call me a total retard here but what in the flying fuck is Dark Fedora?

bzr? - July 17, 2016, 3:12 pm

(Jul 17, 2016 03:09 PM)Armada Wrote: [\[CITE\]](#) Call me a total retard here but what in the flying fuck is Dark Fedora?

Free VPN I think

Armada - July 17, 2016, 3:17 pm

(Jul 17, 2016 03:12 PM)BzRk Wrote: [\[CITE\]](#) Free VPN I think

Ahh thanks. ?

Thanks very much Sir ?

Royrms - July 17, 2016, 4:43 pm

thank you very much for the tutorial

have you by any chance the ay to use this RAT in VM Workstation?

i've tried but it wont work

thx again

Klima - July 17, 2016, 4:51 pm

I use it in VMware Workstation and it works fine for me.

Good luck.

Have a nice day. ?

Can you share the way you made it work

Thank you

bzr? - July 18, 2016, 4:39 pm

(Jul 18, 2016 12:07 PM)Royrms Wrote: [\[CITE\]](#) Can you share the way you made it work

Thank you

Should work just normal in a Virtual Machine, make sure no software is interfering with it.

jjsam32 - July 18, 2016, 7:43 pm

thank you very much Klima for the tutorial and the great chat we had.

thanks so much I really appreciate it. rock on bro its your time :D

Cecilia - July 19, 2016, 2:30 am

I really do think people should reconsider using FagDNS for malware.

I'm fine with whatever you do with it, just make sure it's legal.

Remember that you are going to be banned if your DNS is found on popular honeypot indexes.

Royrms - July 20, 2016, 2:12 am

(Jul 18, 2016 04:39 PM)BzRk Wrote: [\[CITE\]](#) Should work just normal in a Virtual Machine, make sure no software is interfering with it.

Just installing & testing is not working

Cant test host ip link with dns

If you can help thank you

berta080915 - July 20, 2016, 9:33 am

is there a tut where i can see how to portforwarding? i mean the guide that has been linked shows only the openvpn thing

Klima - July 20, 2016, 9:42 am

(Jul 20, 2016 09:33 AM)berta080915 Wrote: [\[CITE\]](#) is there a tut where i can see how to portforwarding? i mean the guide that has been linked shows only the openvpn thing

The portforwarding is directly in DarkFedora website, when you sign in there's a portforwarding section ?

berta080915 - July 20, 2016, 10:26 am

it says everytime "failed" (test all ips)

Klima - July 20, 2016, 10:50 am

(Jul 20, 2016 10:26 AM)berta080915 Wrote: [\[CITE\]](#) it says everytime "failed" (test all ips)

Did you enter the right port and password on the right of the section installation settings ? Pm me if you still got the problem ?

Purple Kief - July 20, 2016, 10:55 am

(Jul 20, 2016 10:26 AM)berta080915 Wrote: [\[CITE\]](#) it says everytime "failed" (test all ips)

That's a bug within the program. Same happened to me.

Ignore it and test your file, should work fine.

Ultra Instinct - July 20, 2016, 6:40 pm

Overall, this is a nice rat and great tutorial to help out others.

bzr? - July 20, 2016, 7:37 pm

(Jul 20, 2016 06:31 PM)jjsam32 Wrote: [\[CITE\]](#) DO NOT DEAL WITH THIS MOTHERFUCKER Klima IS A RIPPER. THE BASTARD TOOK \$150 FROM ME HIS SO HUNGRY. BELOW HIS WHAT HE DID AFTER HE RIPPED ME

"The member Klima has you on their ignore list. You cannot view their profile. You can view their reputation [HERE](#). This is an upgraded member feature."

You care to, you know, backup that statement?

The_Gambit - July 21, 2016, 2:25 pm

what is a DNS for ? if i have a vpn

bzr? - July 21, 2016, 2:26 pm

(Jul 21, 2016 02:25 PM)The_Gambit Wrote: [\[CITE\]](#) what is a DNS for ? if i have a vpn
For those who a) either don't have a VPN or b) people whose VPN's IP may change

Ventriloquism - July 22, 2016, 6:30 pm

Very nice guide. I'm sure this will help users here.
