Thread: [Autopilot Income Scheme | Refund | 15 Minute work for 1 month | LIMITED TIME DISCOUNT](#)

StuffSneak - July 17, 2016, 10:44 am

(Jul 28, 2016 09:10 AM)Aecy Wrote: [\[CITE\]](#) Purchased a copy yesterday and today I set it up. I can definitely see it working out because of all the proofs OP has provided in book. This is very much satisfying as I don't really have to do ANYTHING from now on to earn until next month. Literally took me 30 minutes maximum to get it all set up. Might be lesser but thats because I am kinda slow on hands kek.

Vouch for Stuff. Always has HQ products. This is my 3rd purchase off him I think.

(Aug 5, 2016 02:53 PM)Snify3000 Wrote: [\[CITE\]](#) I have bought this method and would like to give MY PERSONAL REVIEW to help others deciding to buy it or not.

First of all, this is my very FIRST eBook that I have ever bought and reviewed on HF!

StuffSneak is a legit guy and gave me the eBook right after he received my money.

As a user he is very friendly and sincere.

Though on Skype, he took a bit too long to reply on messages which is not bad because he is probably supporting alot of other people :) (be patient with this guy :P)

About the eBook:

The eBook is well written, has Screenshots in it and convinces/encourages you to earn alot of money.

It explains how the method actually works and where the money comes from and how you do this step by step.

About the investment:

The method really does require an investment (otherwise it wouldn't be autopilot). In my opinion, the investment is a bit too high (but not too much either... I am just broke AF LOL ?)

If you wouldn't invest, you'd have to do a lot of work in advance and probably don't even earn a dollar.

About the Autopilot:

The method does not require a tool which has to be run on a PC, MAC, Smartphone, etc.

It is an online method and you really have to watch your earnings.

About the earnings:

The earning(s) seem to be endless and can increase over time with the profits you make and then invest again.

You won't earn immediately though and it takes a long time until you make really big cash.

However, with your first or second payout your investment has already been paid off, with extra profit!

With the profit you can invest AGAIN and AGAIN and AGAIN and (endless) This way you can increase your earnings until the TAX people knock on your door.

About Blackhat/Whitehat

The method seems to be Whitehat and I am not aware of any Blackhat activities.

About the setup

To make the method work, you need to do a little a work aside from the investment. 15 minute work is little bit off. It would probably take me a bit longer to do this. The setup isn't really a big deal and can be done even by newbies (like me). You don't need to install anything or crawl through websites, to find the right thing or something like that. Everything has it's place and is easy to understand.

About the other setup...

After you have done the initial setup to make this method going, you still need to wait for a few, to start your earnings. The waiting is worth and you don't have to do anything at all, the rest is setup by itself. (autopilot) (No need to wait for approval(s)!)

About saturation

I don't think this can be saturated...

About my research

I did some research about all this and I got mixed reviews from other people/sites...

Some say it's a scam and some say it does work and even showed proof that you can make money with this.

But even if it was a scam, there's a refund and you can get your money back easily, so it's safe to try ?

About my opinion/conclusion

Since this is my first eBook EVER, my conclusion is rather good.

I don't have the investment right now, but I will try to save up until I can really try this.

The method excites me and you can earn really a lot of money with ease.

All you need is: Money & Patience

I hope I could help ?

Wait ... if 20000 people try the method will not be effected / saturated?

How much money is expected in first week / second week?

If I can't make that money will you assure me that you will definitely give me a
refund??????????????

Honestly? or will you just say something like "oh you didn't do everything correctly, no refund"

Also is bank account only method of receiving income? Paypal / bitcoin?

Is this the chaturbate method where you set up your house with IP cam's (20 minutes)
and then walk around naked and wait for the money to roll in.

Purchased a copy yesterday and today I set it up. I can definitely see it working out because of all the proofs OP has provided in book. This is very much satisfying as I don't really have to do ANYTHING from now on to earn until next month. Literally took me 30 minutes maximum to get it all set up. Might be lesser but thats because I am kinda slow on hands kek.

Vouch for Stuff. Always has HQ products. This is my 3rd purchase off him I think.

I have bought this method and would like to give MY PERSONAL REVIEW to help others deciding to buy it or not.

First of all, this is my very FIRST eBook that I have ever bought and reviewed on HF!

StuffSneak is a legit guy and gave me the eBook right after he received my money.

As a user he is very friendly and sincere.

Though on Skype, he took a bit too long to reply on messages which is not bad because he is probably supporting alot of other people :) (be patient with this guy :P)

About the eBook:

The eBook is well written, has Screenshots in it and convinces/encourages you to earn alot of money.

It explains how the method actually works and where the money comes from and how you do this

step by step.

About the investment:

The method really does require an investment (otherwise it wouldn't be autopilot). In my opinion, the investment is a bit too high (but not too much either... I am just broke AF LOL ?)

If you wouldn't invest, you'd have to do a lot of work in advance and probably don't even earn a dollar.

About the Autopilot:

The method does not require a tool which has to be run on a PC, MAC, Smartphone, etc.

It is an online method and you really have to watch your earnings.

About the earnings:

The earning(s) seem to be endless and can increase over time with the profits you make and then invest again.

You won't earn immediately though and it takes a long time until you make really big cash.

However, with your first or second payout your investment has already been paid off, with extra profit!

With the profit you can invest AGAIN and AGAIN and AGAIN and (endless) This way you can increase your earnings until the TAX people knock on your door.

About Blackhat/Whitehat

The method seems to be Whitehat and I am not aware of any Blackhat activities.

About the setup

To make the method work, you need to do a little a work aside from the investment. 15 minute work is little bit off. It would probably take me a bit longer to do this. The setup isn't really a big deal and can be done even by newbies (like me). You don't need to install anything or crawl through websites, to find the right thing or something like that. Everything has it's place and is easy to understand.

About the other setup...

After you have done the initial setup to make this method going, you still need to wait for a few, to start your earnings. The waiting is worth and you don't have to do anything at all, the rest is setup by itself. (autopilot) (No need to wait for approval(s)!)

About saturation

I don't think this can be saturated...

About my research

I did some research about all this and I got mixed reviews from other people/sites...

Some say it's a scam and some say it does work and even showed proof that you can make money with this.

But even if it was a scam, there's a refund and you can get your money back easily, so it's safe to try ?

About my opinion/conclusion

Since this is my first eBook EVER, my conclusion is rather good.

I don't have the investment right now, but I will try to save up until I can really try this.

The method excites me and you can earn really a lot of money with ease.

All you need is: Money & Patience

I hope I could help ?

About the setup

To make the method work, you need to do a little a work aside from the investment. 15 minute work is little bit off. It would probably take me a bit longer to do this. The setup isn't really a big deal and can be done even by newbies (like me). You don't need to install anything or crawl through websites, to find the right thing or something like that. Everything has it's place and is easy to understand.

About the other setup...

After you have done the initial setup to make this method going, you still need to wait for a few, to start your earnings. The waiting is worth and you don't have to do anything at all, the rest is setup by itself. (autopilot) (No need to wait for approval(s)!)

About saturation

I don't think this can be saturated...

About my research

I did some research about all this and I got mixed reviews from other people/sites...

Some say it's a scam and some say it does work and even showed proof that you can make money with this.

But even if it was a scam, there's a refund and you can get your money back easily, so it's safe to try ?

About my opinion/conclusion

Since this is my first eBook EVER, my conclusion is rather good.

I don't have the investment right now, but I will try to save up until I can really try this.

The method excites me and you can earn really a lot of money with ease.

All you need is: Money & Patience

I hope I could help ?

Thank you for your honest review. We appreciate it.

If it does turn out to be a scam how would you get a refund?

I will go ahead and answer you. We are using a "service" which has been running since years and is big. Now service that a big will certainly have some bad reviews in belt which are very less compared to good reviews. As long as you do not abuse it with TOO many runs, like 100+ which will never be in our case, its good.

If you don't earn with your investment you get your money back easily.

If you buy the full package you get also a refund for the paid ebook from StuffSneak (see his T.O.S.!)

Read the review...he stated the investment was quite large, how much do we need to start this method OP?

I think most users here on HF who have made some money already, can invest the amount.

I would do it if I already had the money to investment.

If it doesn't work you get your money back anyway so in my opinion it is safe to at least try it.

I've spoken with OP, and the amount he told me required to invest is quite feeble(small), which made me more interested....but for those of you who have purchased, will you leave a review after setup? A bit more detail on how long it took you to earn your investment back.

Hi mate.

As it has monthly payments, it will take long to see actual results from customers real soon. You are welcome to wait though ?

I have purchased,

If this method work properly as OP said then also you have to wait at-least 35-40 days for first payment and according to method no way to get your investment back within that day, in my calculation you have wait at-least 2 month or more for getting back your investment (including method price). As I said If everything work as OP said.

This looks legit, and you look like a HQ user. GLWS!

Ke1r - September 30, 2016, 5:51 am

This is a bunch of bullshit guys, I bought the method and they did provide support as much as they can.

I requested a refund and paid the extra 5\$ for the E-book, unfortunately they did not refund me even tho I paid the extra money for security.

Paying with PayPal I will have to dispute the payment, It took me 2-3 months to get it all set-up and an investment which is WAY higher than what they told me before I bought the E-book.

It doesn't end here lol they updated their TOS saying that I have to try the method 3 times minimum in order to request a refund which is over 300\$ in investment when I already bought an E-book that doesn't offer what the owner offered me when purchasing it.

I paid extra money for security, you couldn't offer me what was offered before purchasing it...I expect my money back.

Filing a dispute right now since I already tried contacting you and kinda got the understanding of fuck off.
