This looks amazing, only thing is (and it's probably just me) but the mountain's shadows look a bit off based on the angle from the sun.

This flat design is absolutely stunning! Very beautiful work.

It might be a little biased because I love flat designs, but this looks like you put a fair amount of time into it.

Keep it up!

Malthemar - July 23, 2016, 3:35 pm

Aw this is great.

I saw it in the news post earlier this week.

It's genuinely rather beautiful, OP.

Well done.

SilentKing - August 4, 2016, 7:35 am

How long did it take you to make and did use illustrator

Btw really nice

if-ea - August 4, 2016, 9:39 am

Yeah, I used illustrator.

I took me around 3 hours, but I had no idea what I am working on and I was some sort of getting there.

If I knew what I am doing, I would've done this in 30ish minutes.

if-ea - August 19, 2016, 7:18 pm

I have updated it with the wallpaper link

Eelkey - August 19, 2016, 9:06 pm

Nice one bro. Gotta try this too. Love doing stuffs with illustrator especially and paths. This is the sunshine I think now you need to do that dark magical night on sea with a big moon with so many round circles just like swiss cheese hahaha :)
