Thread: [Pupy RAT Python\C+\Java Coded RAT \(Full SRC\)](#)

charmeur - July 18, 2016, 1:13 pm

Implemented modules:

- migrate (windows only)
- inter process architecture injection also works (x86->x64 and x64->x86)
- keylogger (windows only)
- persistence (windows only)
- screenshot (windows only)
- webcam snapshot (windows only)
- command execution
- download
- upload
- socks5 proxy
- local port forwarding
- interactive shell (cmd.exe, /bin/sh, ...)
- interactive python shell
- shellcode exec

Download Link:

PHP Code

Pupy works well enough for specific things.

That all being said, this RAT is known already, and it's up on a public space, there is no need to post this for an easy post count.
