Thread: [Viewing a users username history](#)

Humo - July 18, 2016, 3:24 pm

Why when I view a users username history it only shows the last 6 months. For example if I view someone who had a username change, but longer than 6 months ago it says "No changes are logged in last 6 months."

Or is it an upgraded only feature?

Thanks.

Neos07 - July 18, 2016, 3:25 pm

You can only see the changes that occurred in the last 6 months either upgraded or not.

You used to see all the username changes, but it was recently changed to 6 months.

If you don't mind me asking, why was there a change?

Talu - July 18, 2016, 3:26 pm

People complained about the username history, because of doxing and whatnot. Then it was changed to 6 months.

Not entirely sure why.

Here is the thread with more information.

Diabolic - July 18, 2016, 4:07 pm

There you have it, people feared doxing, thus Omniscient changed the way it worked.
