FAQs

Spoiler ([Click to View](#))

Why is your product better than the other products on the market?

Our product is better because one, it is affordable. Two, it comes with unmatched support and stability. Three, we do not plan on going anywhere. Many updates and new features are to come. But with more features, the price will increase as well. With the 2.0 update, prices have increased.

How long until I receive my product?

It is currently not autobuy, but you will receive your product within 24 hours of payment.

What crypter works with MetroHTTP?

I don't know, don't ask me. The stub itself is currently 11/35.

What features are you planning on implementing?

I plan on implementing password recovery, a cryptocurrency miner, Botkill/Antibotkill, Socks 5 Proxy, Keylogger, and some more fun features that have yet to be determined.

Will you help me setup my panel?

I will help you to some extent. I will not do it all for you, if you want me to set it all up for you, that will cost you \$10. I can do as much as I can for free over PM and Skype, but I will not set it up for you.

I have some more questions?

PM me.

Setup time:

It took 9 min. 5 of those min was because my internet sucks.
10/10

Design:

Holy shit its an really good looking design! But it can still be improved.
9/10

Over all:

This is really good for starters! Its cheap and easy to understand. Its affordable you do not have to spend 100\$ on it. The support was good and the guide that followed whit the botnet

I would give this botnet an 9/10! I would 100% recommend it!

Panel design: 9/10

This panel is so sleek looking and is easy to use. Anyone can navigate through it and the colors used are really easy on the eyes. Stepa has everything a panel should from statistics, bots and everything ddos related to logos, creative button designs and more!

Support: 10/10

Stepa was there anytime I had a question, he helped me set it up and walked me through installation and was very informative, friendly and always there for assistance. It blew my mind when he would reply back super quickly, he was always really friendly with anything he had to say.

Installation: 10/10

This botnet was super easy to setup. All I had to do was drag the files over to the webhost, add the sql file into PHPMysqladmin and edit one text file. The installation probably took a total of 5-10 minutes.

Overall: 9/10

This botnet was super nice looking, worked perfectly and is well worth it for how cheap it is. The owner Stepa is very friendly and a really nice guy. Anyone can run this botnet easily. I highly suggest if you're looking for an HTTP botnet you go to Stepa, he will help you all the way through installation, and answer any questions you have. Do not be afraid to purchase this botnet, it is well worth the money and so easy to use!

Thanks for the vouch copy Stepa and good luck with sales on this awesome botnet.

Just as a note.. Instead of adding a full date and time in 6-7 drop downs/side for expiry in your panel, you should rather ask how many seconds until expire.. or minutes..
Doing it the way you do now looks a bit messy.

Just sharing my thoughts :)

You can't be sure, I'm not gonna lie to you and say that oh this is never going to discontinue. All projects come to an end.

But I can tell you that its not going to discontinue in the next few months, and its only \$25. Its not hundreds of dollars.

PAY ATTENTION!

I bought the 35\$ package... he sent the webpanel.. as he wanted to compile the stub, he went offline.. said he just wants to reboot his system. now he's offline for like 2 hours. probably a scammer:

Thank you for the vouch, glad you are satisfied with your purchase.

I have fixed all issues and built everyone's stub.

litauen - August 21, 2016, 7:26 am

I received my stub. Everything went fine, bot is working. The bot is totally worth its money, the prices are great too

Torture GoD - August 21, 2016, 8:29 am

I bought MetroHTTP and have to say it works great. Very nice panel design. For features I give it 10/10.

BLOW. - August 21, 2016, 9:26 am

Vouch for this guy, very nice panel design but can be better :) Have got 200 bots now, verry stable.. !

Still available. A lot of new things are coming VERY soon with the update.

MetroHTTP 2.0 is done!

Just a few minor touch ups that need to be done, and it will be released tomorrow!

Rhinemann - August 22, 2016, 7:41 pm

Really interested but finding stable hosting is difficult, at least it was the last time I tried.

STEPS

?etro - August 23, 2016, 8:45 pm

Thank you.

Please everyone take a moment to re read the features list and take a look at the screen shots.
I strongly believe you will be pleasantly surprised.

frodriguez96 - August 24, 2016, 12:47 am

Love the clean new design. Glad the time functions are redone.

Edit: Stepa fixed the small bug :P everything works perfectly

?etro - August 24, 2016, 11:17 am

Fixed that minor bug.
Thanks for that.

PM me to buy if interested or have questions.

Amaa - August 24, 2016, 1:36 pm

The 2.0 is very nice updated. The interface is very clean and nice looking.
Everything works and bugs are fixed!
Recommend buying, its worth it

Can you make the stub .NET 4.0 dependent instead of 2.0 please. It is the only thing that is kinda pushing me away.

.net 4.0 dependant is even worse than .net 2.0, if for whatever reason u want 4.0 then just get a crypter that exports as a net 4.0 such as kazycrypter. Good luck get many bots with that though since .net 2.0 is still more widely used to infect and even though windows 10 may have 4.0, it's much harder to spread onto windows 10 and at that point you are better off getting a non dependant botnets such as betabot

?etro - August 26, 2016, 3:15 pm

Say for example, if you decide to move your panel to a different URL, the stub will still connect to your old URL. You will need to rebuild your stub so your bots connect to your new URL.

Or just have the bots connect to a DNS you can reroute.
