Nice video. Some decent information and ideas for others to use. I left a like on the video for you, hope it helps in some small way. Keep up the good work and keep hunting for those Pokémon :)

I knew most of it already, but you did explain everything very well so newbies will understand it easily. Good video, keep it up.

Most of the stuff are known ones but its a good video anyway !!

Would suggest that when you post another video try posting about something newly discovered/you found it. I will hit SKY ROCKET

I was almost 100% sure it was better to walk around with it, thank you for confirming that =)
