Thread: [Tired of Pokemon Go posts on "View New Posts"? Check this](#)

Neeeeeeeeeeel.- - July 19, 2016, 7:44 am

Are you tired of it?

Download [Greasemonkey](#) (or any userscript browser app) and add my userscript.

([CHROME ALTERNATIVE](#))

Since "View New Posts" uses the forum search engine, the script affects the whole search engine. It means that if you use the search, you won't see any post from "Pokemon GO" section.

It justs deletes the line when it find it's from "Pokemon GO" section. Hope you enjoy it.

I can assist you installing it. Just HMU.

PHP Code

```
<?php
// ==UserScript==
// @name      HackForums Anti-Pokemon Go
// @namespace  hfapgo
// @description The script deletes all threads from Pokemon GO section (it also does it when you click "View New Posts")
// @version   1.0.0
// @grant     none
// @author    Neeeeeeeeeeel.-
// @match     */*.hackforums.net/search*
// @match     */hackforums.net/search*
// ==/UserScript==
```

```
setTimeout(function(){
  if (document.getElementsByClassName('quick_keys').length > 0){
    var t = document.getElementsByClassName('quick_keys')[0];
    t = t.children[1];
    var length = t.children[0].children.length;
    for (var i = 0; i < length; i++){
      var tr = t.children[0].children[i];
      if (!tr || tr.children.length < 3){
        continue;
      }
      if (tr.children[2].innerHTML.match(/Pokemon GO/i)){
        t.children[0].removeChild(tr);
      }
    }
  }
}, 1000);
```
