Thread: [\[Video\] Orcus \(1.9.1\) Setup + Feature Rundown](#)

Purple Kief - July 19, 2016, 9:43 am

Updated on 04/28/17

Keep in mind the following.

- This is not an official video, this is made in my own free time cause I felt like it.
- Port forwarding is covered more in-depth here. (other VPN providers + without VPN)
<https://hackforums.net/showthread.php?tid=5327327>
- Followed my video but gettings errors? Make a ticket on <http://orcus.pw>
- Leave a comment if you enjoyed so it can help more people like you.

Aside from that I hope you all enjoy this and it helps some of you. :)

[Video: https://www.youtube.com/watch?v=3yxFL_flpCw&feature=youtu.be]

Old video.

Spoiler ([Click to View](#))

This has been removed. It does not come close to the quality of my updated video.

memesaregreat - July 19, 2016, 9:45 am

nice tut, could help 90% of the RAT section.

jaydei - July 19, 2016, 9:53 am

awesome tutorial Kief, this is gonna be really helpfull !

Windows - July 19, 2016, 9:54 am

Great tutorial Kief, this should help possibly stop posts like this here.

K3njii - July 19, 2016, 9:58 am

Nice tutorial! Surely this will help members having issues setting up Orcus.

yotoprules - July 19, 2016, 9:59 am

Nice tutorial! Will help a lot of Orcus users definitely!

Armada - July 19, 2016, 10:27 am

Very well done.

Hopefully this can help users with the basics and reduce our ticket queue for the simpler issues.

THC - July 19, 2016, 10:32 am

Very good video! Going to have to reference back to this when I set up my orcus!

Well done sir.

Klima - July 19, 2016, 8:01 pm

Great Guide Kief, always helping the community ?

Nick (Name) - July 19, 2016, 8:24 pm

Very well put together! I'll have to release my videos for other setups! This is definitely a good tutorial for setting up Orcus!

bzr? - July 20, 2016, 3:06 am

Nicely done Kief, I learned something from that so it's definitely gonna be useful :)

Slavoj Žižek - July 20, 2016, 3:19 am

sexy tutorial kief ;)

should get them noobies up and going

casque12 - July 20, 2016, 3:39 am

Nice you should have included Linux setup also

also in video i see you put ip for the connection i wouldnt do that incase it goes down those cryptic server's are digital ocean i think and have very small amount of ddos proection nice tut tho

Purple Kief - July 20, 2016, 6:46 am

(Jul 20, 2016 03:06 AM)BzRk Wrote: [\[CITE\]](#) Nicely done Kief, I learned something from that so it's definitely gonna be useful :)

Didn't see that one coming, glad you did tho. ?

Thanks for the kind words everyone, the developer himself (Sorzus) viewed the video and told me about some very minor changes that could improve performance. (And also explained what the windows service option actually is)

I'll be updating the video with a new one later today and leave a comment to let everyone know. ?

OnlyLee - August 16, 2016, 8:06 am

You just save my day, after hours struggling with set up i nearly want to give up for another RAT, but somehow remember and pm you on skype. Once again thank you so much for your effort, btw Orcus is awesome !

Purple Kief - August 20, 2016, 5:32 am

Giving this a bump since I get people asking how to set up Orcus quite often.

Guys this video exists and it has solved every problem so far. :)

Also this is my 2000th post, onto another 2000. ?

Veracrypt - September 8, 2016, 12:54 pm

Another great tutorial from this guy. Thanks for helping the community.

CKkio23 - September 9, 2016, 1:01 am

[Video: https://www.youtube.com/watch?v=wZncPY_p0Ao]Great tutorial i had confusion about the ip part at first then you guys helped out alot. working and stable.

SIM-2580909 - September 9, 2016, 2:59 am

Great Tut purple keif, Thanks for being such an amazing part of HF rat community

Purple Kief - September 9, 2016, 6:51 am

Thanks to all 3 of you for the comments, glad you appreciate my work. :)

Purple Kief - September 21, 2016, 9:06 am

Since some people are still struggling with Orcus I've decided to bump this again.
Check it out. :)

obitex2k2 - September 24, 2016, 2:18 am

Thanks purple kief, i enjoyed this tutorial and it helped me to set my orcus up too, Thanks bro

visfinity - September 27, 2016, 5:04 pm

hello.....pls am having problem with portforward i have off firewalls and disable window defender still the port is not listening...pls what can i do?

rootjoyy - October 6, 2016, 9:19 pm

am having the same problem i have followed the tutorial still yet am having the same problem to connect. i am using the crypticVPN ipv4 and it listening and after that i try to connect it refuse connection and i thought something was wrong i tried to reset it again from the beginning it not even accept to create server before connect am just so confuse. and it does not even show in canyouseeme that is listening. But LumosityLink accept and work perfect i don't know what is the problem i will send you a pic so that you understand what i mean

fannas1 - October 6, 2016, 10:59 pm

Very well set up tutorial. Thank you it helped me.

Purple Kief - October 7, 2016, 5:40 am

Olympus - October 8, 2016, 10:19 pm

Purple Kief Awesome tutorial it would be amazing if you could do a tutorial of the client builder because the descriptions of what they do doesn't make all that much sense to me, such as:

PROTECTION:

respawn task what is this useful for what does this do exactly?
watchdog does that work kind of like persistence?

INSTALLATION:

Hide file: will this just make it harder for the client to find your file?
Autostart: i do not understand any of that....

General questions:

Wouldn't asking for admin rights in any of them increase detections dramatically?
Also is there a startup with this or do you use the startup in your crypter? (I use cyberseal)

Cheers in advance i use to use luminositylink thought it was time for a change.

Purple Kief - October 10, 2016, 6:23 am

I'll consider it. Thing is, I like to divide the attention I give every RAT equally.
That means when I release guides, I'll always try to do it for every RAT instead of just one.

I simply don't have the willpower to release a full feature rundown on every RAT right now.
But I'll keep your suggestion in mind, thank you. ?

Sorzus - October 10, 2016, 7:46 am

Seems like my time has come...

@Rexicon

Respawn Task

Create a task in the Windows Task Scheduler which executes every few minutes and executes Orcus (if Orcus is already running, nothing will happen)

Watchdog

Watchdog is a separate process which protects the Orcus process. By default, it just restarts the process of Orcus if it's killed or suspended. You can also check prevent file deletion which makes it impossible to delete the file of Orcus as long as Watchdog is running

Hide file

That is a Windows feature, it just hides the file from the Explorer if the user unchecked "Show hidden files"

Autostart

Disable Autostart - Don't start automatically

Registry - Start using a registry key in Run.

Task Scheduler - Create a task which executes at Windows startup and starts Orcus. You should note that this requires administrator privileges, but also executes Orcus as administrator

Don Genovese - October 10, 2016, 8:06 am

Nice video mate, seems like it will be very useful ?

Purple Kief - October 12, 2016, 6:44 am

(Oct 10, 2016 07:46 AM)Sorzus Wrote: [\[CITE\]](#) snip!ll 1 up you one day. ;)

(Oct 10, 2016 08:06 AM)R.Reddington Wrote: [\[CITE\]](#) Nice video mate, seems like it will be very useful ?Yeah it's okay, still lacking though.

Considering re-creating the entire video, Orcus has had a decent amount of updates.

Just re-watched this.

@ 4:45 - That was not a bug For your info. The server did not recognize the request sent to it, so it threw that error, in fact that was caused by your use of canyouseeme.org to test the port. ?

Purple Kief - April 28, 2017, 7:23 am

I think Sorzus pointed that out for me when I was still in Orcus staff chat. ?

If I took half a minute to look at it I would've figured it out too.. ??

But yes, for anyone that isn't aware that was not a bug. Just Orcus wondering WTF that connection was.

Armada - April 28, 2017, 7:32 am

I really should do an updated version of this for everyone.
This covers 1.4.1, we are at 1.9.1 now, and working on v.2.0 currently.

What recording software did you use for this video?

Try using a Bridged connection from the virtual machine/sandboxie.

busybrain - May 31, 2018, 6:57 am

PLEASE I JUST WENT THROUGH THESE THREADS. I SEE THAT TO SETUP THIS ORCUS YOU NEED TO HAVE DDNS??

FOR ME I JUST HAVE THE RAT AND MY OPEN VPN WHCIH I CREATED MY PORTS WITH. I CAN ONLY INFECT THE RDP I HAVE ON MY SYSTEM BUT NO OTHER SYSTEM IS CONNECTING TO ME. CAN ANYONE HERE HELP ME ON THIS.

IT IS BECOMING VERY ANNOYING BECAUSE I HAD TO DISABLE ALL MY ANTIS AND DEFENDER AND WIREWALL FROM THE RDP YET IT IS NOT CONNECTING.

PLEASE PM ME ONLY IF YOU CARE TO HELP.. THANKS

Exodus - May 31, 2018, 6:59 am
