OK guys here is the full story

This is the whole truth guys something happened yesterday that made me realise what I could not see

Yes I had gambling problems and like with any addiction you mask it and think its OK

About 4 months ago I discovered bustabit and on my first day I won 13 BTCs but that week I lost it all, but from then I was hooked and thought that if I won that much I must of found a method to make you win, but I was wrong. I know now that it is completely random and no script will help you. it just helps in certain ways but you will never make a living from it.

I would honestly say my OCD didnt help it just made matters worse, and I sold a lot of stuff just to try and get the right method to win.

List of stuff I sold

6 fishing rods total cost = \$500

2 fishing reels = \$300

My 2nd PC sold it on here for \$250

Yes I lost all that and any other cash I made online. I need to go trough all of the accounts to see exactly how much, I will update the thread later.

I am a complete idiot as I have gone as far as this journey has taken me.

This is what my conclusion is and what the end result was.

I found my scripts helped in 2 ways.

1. It did save you sometimes from after a high number came in you could get it to stop as a lot of the time anything over 22 the next will be a low red.

2. You could set the script to stop after a certain amount of losses, to stop you busting out.

So I would set it to 2 losses then recovery manually on the 3rd, but this is not 100% you just have to guess.

Here is a full list of all of my accounts I have nothing to hide now its all over.

Spoiler [\(Click to View\)](#)

I have about \$100k left in one of the accounts once thats gone its over for good.

Finally I just want to say sorry to the community who I was having arguments with I hope you can forgive and forget.

One good thing came out of this I met a member on here who helped me get away from this and gave me a really good money making method.

So I will be concentrating on this method from now on and not bustabit to fund my income.

I have faith in Shadow. Would you like to wager that?

Just give him another chance to redeem himself. I'm sure he's doing this for good.

Good luck Black Shadow.

You can never get enough of Greed, its true. Once your making money you want more its all greed, just human nature and i guess Blackshadow got caught up in it all.

Just gotta let it go mate.
