Hello.

Scammer profile: <https://hackforums.net/member.php?action=profile&uid=2702524>

Posting to inform other users to beware of member #[2702524](#).

He sent me a PM stating:

imnerdist Wrote: Hey man have you ever worked with wordpress? Looking for some smart individual that would be able to help me out <https://hackforums.net/showthread.php?tid=5337091>

The thread regarded adding a side-bar to his website. He wanted to move the "product categories" widget from the footer to the header on his website, <http://actuallyawesome.com>.

I went on and completed the work for the user without upfront pay. He provided WP-ADMIN account and FTP. After the work was completed, I let him know and he said he'd pay me as soon as he got home from work, a few hours later. Never got payment, and he changed WP-ADMIN account and FTP making the inaccessible to me.

Message him for over a week. Never heard back. Sent him a PM via HF, never heard back. Saw he posted today [here](#), I commented saying I would help him but he owed me money and had to pay up. As soon as he read my reply, he "closed" his thread and went offline. Have yet to hear from him. Hopefully this report will get his attention.

Proof Of Completion:

Thank you.

There is a link, but I've just added a new, more obvious one.
