Thread: [Devil Crypter | Immortal Persistence | Stable | Need 10 Beta Testers](#)

_Devil - July 20, 2016, 6:38 am

You can get all info about Devil Crypter from here :

<https://hackforums.net/showthread.php?tid=5340750>

I am looking for 10 users to test Devil Crypter before I start selling. I would like to Test out Stability , Bugs , Functioning of all features , Execution Rate and Runtime Detection's. I would like Technical users who can perform this task, Not any Random User. You need to meet below requirements to be accepted.

Requirement:

Code Account Must be old then 2 Month

Rep must be 25+

Post Count should be more then 150

Must have skype

leet/uber users Preferred

Post below with this info only if you meet above requirement:

Code Tools you have used

Crypter You have Used

Which AV can you test with

How many Bots you can test with

I will be giving out 3 to 5 License to Users who help me the best in Beta Testing.

Status : Still Looking for Testers

malusdefou - July 20, 2016, 7:04 am

Hi there ?,

great initiative from you, i never saw someone making this kind of "bêta testing" of he's crypter, Hope it will be a nice experience for you and for testers,

I wish you an awesome future for you and your crypter and staying with the HF community for a long time. ?

I don't want to test it or something like, just to motivate you, you're fully in your project, it's an awesome virtue. ?

Peace&3XPL0ITS ?

Purple Kief - July 20, 2016, 7:09 am

Tools you have used : All of em. Lol.

Crypter You have Used : 80% of em.

Which AV can you test with : <https://hackforums.net/showthread.php?tid=5300213>
How many Bots you can test with : Don't plan on testing bots. Just testing stability with RATs.

Check my threads for more information about what I do.

_Devil - July 20, 2016, 7:39 am

(Jul 20, 2016 07:09 AM)Purple Kief Wrote: [\[CITE\]](#) Tools you have used : All of em. Lol.

How many Bots you can test with : Don't plan on testing bots. Just testing stability with RATs.

Check my threads for more information about what I do.

Yes, Your runtime scan Testing service can help me a lot. Will soon send you a PM.

Snubb- - July 20, 2016, 8:44 am

Tools you have used : I usually don't use other tools when I don't have too, I've made my own tools in the past (Crypter 0/35 for 2 months, went detected today, My own Booter-Botnet with around 75+ slaves, Then whenever I've had to, I've used tools such as AV-Fker and Offset Changers and I know these work.)

Crypter You have Used : Orway Crypter (Not a HF Tool. Not meant to advertise.)

Which AV can you test with : Kaspersky Sky, AVG, BitDefender, Avira.

How many Bots you can test with : I'm not into RATs. I have my detected files on my Desktop to run tests on them and make them work even if they are FUD.

Sorry I do not have 150 posts, I was Away from January due to an arrest and stuff going on with the police. Can skype you if you want to know more about it, otherwise I'd rather not talk about it. ?

casque12 - July 20, 2016, 8:54 am

Tools you have used : Luminosity, Nanocore, Netwire, Im4, oZone& all free one's

Crypter You have Used : Darkeye, Dataprotect, Cyberseal, Deluxe (these are best i used) + more

Which AV can you test with : Most popular av's. I cant test runtime + startup/reboot

How many Bots you can test with : Probably around 10 +

sWEeTBoY - July 20, 2016, 10:29 am

Tools you have used : Nanocore SkyWyder and Ozone many others

Crypter You have Used: bytes crypyter

Which AV can you test with: symantec sonar runtime+scan and F-Secure Internet Security ,Nod32 many more

How many Bots you can test with: 20+

Infinity. - July 20, 2016, 10:34 am

Elaborate on your function

"Immortal Persistence"

Hope that's not an issue.

_Devil - July 20, 2016, 10:49 am

(Jul 20, 2016 10:34 AM)Infinity. Wrote: [\[CITE\]](#) Elaborate on your function

"Immortal Persistence"

Hope that's not an issue.

Just look at the link on the TOP , there is a video on it.

Hope that's not an issue to check it out.

You're a retard if you think I asked that.

_Devil - July 21, 2016, 10:09 am

(Jul 20, 2016 11:03 AM)Infinity. Wrote: [\[CITE\]](#) You're a retard if you think I asked that.
I just answered what you asked, I am not good with English , sorry if i miss understood.

yotoprules - July 21, 2016, 12:38 pm

I don't have 25 rep, but I have helped beta test software for people before and been successful with it. If you need any more beta testers I'm right here! :D

DontQQSoMuch - July 21, 2016, 1:04 pm

Tools I've used: Most of them. Can test the crypter with native and .NET managed malware. I can test the crypter with: LL, NanoCore and Beta 1.8.

Crypters I've used: Most of them. Short list: Praesidium, TopherCrypter, ByteCrypter, ExeProtector
What AV I can test with: Nearly all. Windows Defender, ESET and a few more
How many bots can I test with: With a few hundred bots. About 200-500

Skyrim Modding - July 21, 2016, 3:56 pm

Hey would like to be beta tester!

OctyBaker - July 22, 2016, 7:44 pm

Still need tester? i would love to bro!

_Devil - July 22, 2016, 10:23 pm

(Jul 22, 2016 07:44 PM)Vincent™ Wrote: [\[CITE\]](#) Still need tester? i would love to bro!
You can apply as mentioned on the thread,
I will select best 10 Testers by next week ?
They will also get a free license.

Codefuser - July 22, 2016, 10:51 pm

2 suggestions for you:

First, test it out yourself using a VM. What's so hard after all?

Second: Does your "Immortal Persistence" survive drive killing? If not then it is "Strong" but not "Immortal".

And I think Infinity.'s question is about the method you are using to achieve persistence (ntdll, Watchdog, etc)

Dave from the lawyer firm - July 23, 2016, 7:55 am

woah guys relax and just help eachother out.

h4ck3rs4l1f3 - July 23, 2016, 5:01 pm

Tools you have used : DarkTrack 4.0 Alien, Babylon.

Crypter You have Used : Visual protector (all versions), CryptEx and GhostCrypter.

Which AV can you test with : Windows defender, Norton. (all others with trail versions too)

How many Bots you can test with : Don't have many bots but will try to spread as much as I can.

Thanks in advance.

Have a nice day. ?

EDIT:

I know I don't have all the requirements but thought that I could still try. ? ?

_Devil - July 24, 2016, 12:38 am

(Jul 22, 2016 10:51 PM)Codefuser Wrote: [\[CITE\]](#) 2 suggestions for you:

And I think Infinity.'s question is about the method you are using to achieve persistence (ntdll, Watchdog, etc)

I have already tested it on VMware , but I believe more hands can make good testing from all angles so Only I am looking for beta Testers

For your second suggestion I can only say what I said to Infinity. There is a link on top of the thread , please go through there. It has all info. You will get info of all 3 persistence I got. ?

Offtopic: You suggestions remind me of an old friend wardow. ?

n0\$f3ratu\$ - July 24, 2016, 1:18 am

Hey @_Devil.

First of all congrats on making your own crypter.

Second of all some of your features requires admin privileges and some don't belong in a crypter.

Third of all your "immortal persistence" if is behaving the way I've seen then you should know by now is detected on runtime by some av's.

Forth... if you really going to go through with your spreaders and disablers then you will NOT gonna bypass any AV.

_Devil - July 24, 2016, 2:06 am

(Jul 24, 2016 01:18 AM)n0\$f3ratu\$ Wrote: [\[CITE\]](#) Hey @_Devil.

Forth... if you really going to go through with your spreaders and disablers then you will NOT gonna bypass any AV.

Thank you very much for your input

- I have managed to get those features without Admin privilege

- Have Tested the Persistence and from the initial Testing with some AV it Came out 100% FUD, but I am looking to get it tested by some more AV with beta testers and I will Post here How it goes. (There is No drop so there is less chance of detection's)

- Disablers are FUD but you are correct with the spreaders, some of them like USB, they are detected by AV but AV will block the Process but does not block/remove the file. So its for some users who dont care about such things.

Sir if you got anything else in Mind , please ask. I would love to discuss with you and improve myself.

Dobby - July 24, 2016, 3:04 am

Tools you have used: Alot, Siriously almost everything

Crypter You have Used: Same as above,

Which AV can you test with,All The Major av's also some of the lesser known ones

How many Bots you can test with: pm me about this.

_Devil - July 24, 2016, 4:41 am

Sadly I don't do .NET programming :D
Neither do I know ASM.

maldev0 - July 24, 2016, 8:46 am

Anti Memory Scan is a complex procedure to be honest. And from my knowledge a proper anti memory scan is not possible from usermode, especially not in .NET

_Devil - July 24, 2016, 9:26 am

(Jul 24, 2016 08:46 AM)ArtificialIntelligence Wrote: [\[CITE\]](#) Anti Memory Scan is a complex procedure to be honest. And from my knowledge a proper anti memory scan is not possible from usermode, especially not in .NET
I think you should Increase your knowledge, Its 2016 and almost everything is Possible. ?

There are around 2 or 3 Anti-Memory Scan module Available on HF.
One of the Best if you can pay : <https://hackforums.net/showthread.php?tid=5315407>

Codefuser - July 24, 2016, 9:28 am

(Jul 24, 2016 08:46 AM)ArtificialIntelligence Wrote: [\[CITE\]](#) Anti Memory Scan is a complex procedure to be honest. And from my knowledge a proper anti memory scan is not possible from usermode, especially not in .NET
You are a bit wrong here. Anti Memory Scan CAN in fact be implemented from usermode (even though AVs operates at Ring 0), which shows us how poorly coded AVs often are.

_Devil - July 24, 2016, 9:30 am

(Jul 24, 2016 08:04 AM)Codefuser Wrote: [\[CITE\]](#) Sadly I don't do .NET programming :D

Anyone can do AutoIt tbh
And look at some of his posts, he made some shits in ASM and C
I don't do C at all, I am only learning C++
Furthermore, I am not a french baguette. ?

EvilNerd - July 24, 2016, 2:29 pm

Tools you have used: poison Ivy(my first rat !), bifrost,cybergate, darkcomet, nanocore.
Crypter You have Used: byte crypter, de luxe, metascrambler, data protector, praesidium, razor, slice crypt, fly crypter,topher (as beta tester)
Which AV can you test with basically all ? just tell me what do you prefer, however AVG,Avira,Avast,norton, trend micro are the most common
How many Bots you can test with. very little. I'm specialized in targeted infections, absolutely not opportunistic, indiscriminated spreading. Just 10-15.
However this is good for keeping fud your crypter: since is a new one there's no point in massively spreading to all the antivirus in the world ?

White Partyhat - July 26, 2016, 3:54 am

Not sure if you still need testers, but here goes.

Tools you have used : Pretty much all.
Crypter You have Used : Most probably 60% of them.
Which AV can you test with : We have a company that has multiple workstations all fitted with different AVs
How many Bots you can test with : Got a few of mine, That's all I'm currently willing to test, might test more on a VM or something

DoubleClickBTC - July 26, 2016, 4:15 am

Tools you have used: Ozone, Nanocore, Orcus, Helped with LL, More but cant say here
Crypter You have Used: Topheric, xCrypter, GhostCrypter
Which AV can you test with: All the major ones
How many Bots you can test with: 500+

_Devil - July 26, 2016, 6:14 am

Pm send to few users who were eligible according to me,
will contact other as I am done with them.

_Devil - July 27, 2016, 1:38 pm

Update 1:
-Fixed the GUI bug which appeared some some system with high resolution.
-Small bug fix

Liquir - July 29, 2016, 4:15 am

I'd love to test this out for ya mate :) ?

_Devil - July 29, 2016, 5:12 am

Have send you all details over Skype,
looking forward towards your Test outcome.

Liquir - July 29, 2016, 5:31 am

Ok, so after some testing, id like to say this crypter is great!

Right of the bat we have a 0/35 crypt, which is an instant bonus! Looking into the features i see there are tons! I tested the persistence, and i have to say, Woah! The persistence on this crypter is insane! The crypter also looks promising for runtime fud! I tested it with 5 different AV's including Avira , avast , gdata and kaspersky, and it bypassed all of them.

Great crypter! When this goes on sale, i will be purchasing!

Good luck with the sales bro!

yotoprules - July 29, 2016, 5:47 am

Thanks a lot! I have to say this is a great crypter! There are a few bugs, for example injection persistance completely prevents it from running, and disablers do not work, and the occasional time of it not running properly. Rebooting the machine fixes the issue for me. I've only tested the runtime on Avast, but it bypasses the deep-scan easily, and it has a nice feature where it blocks execution when deep-scan is running, although it would be nice if that was hidden instead. Overall this is a great crypter! When the bugs get fixed and this gets released do not hesitate to buy!

Spoiler [\(Click to View\)](#)

Thanks a lot! I crypted my stub and is still 0/35 with all disablers on, startup, and persistance!

Spoiler [\(Click to View\)](#)

Also every bug appears to have been fixed!

_Devil - July 30, 2016, 11:41 am

I must thanks yotoprules for working hard on the Testing, Some more bug Fixed reported by him.

Fix :

- Fixed Injection persistence
 - Fixed Crash Due to Elevate Process
- and some other Fix

Also have fixed Eset Nod32 HIPS Runtime detection reported by Evanescent

As for now we successfully bypass Norton, Nod32, Avast, M-byte, Avira, Kis , g-data, Quickheal and some other Runtime + Scantime.

domien - July 30, 2016, 12:18 pm

Tools you have used: Almost everything

Crypter You have Used: I make my own

Which AV can you test with: Avast, AVG, McAfee

How many Bots you can test with: ~10

Had alotfree service threads in the RAT section in 2011-2013. I quit giving these services since I lack time.

My Crypter has already been tested with that AV and it passed it with a ease.
Thanks for applying ?
