Legit walk and haven't had credit for a few days so all 100%. It would be more but as I said, no credit. Topping it up today hopefully, that's why it's on wifi in that pic.

I'm too lazy to take screenshots and upload them right now. I started a new account and I've walked 9.55KM so far. That's not much at all. I thought it would be higher????? This game is a dang rip off I swear.

Sadly a third of that isn't legit. I rarely have time to actually go out and play. I mostly play while I'm at work.
