Thread: [SCAM REPORT - Office Exploit Builder - Mon£y uid=123689](#)

Qismon - July 21, 2016, 10:49 am

CURRENT SALES THREAD: <https://hackforums.net/showthread.php?tid=5321276>

OLD SALES THREAD: <https://hackforums.net/showthread.php?tid=4713515>

Just a warning to everyone, he promotes this as FUD which is complete bullshit! Not even close, most of the time between 5-8 detections from Major Anti-Virus companies. Useless.

I bought this months ago and still have not been able to use it after requesting support several times with 0 help.

In his own ToS he states:

4. The product may not be 100% FUD at all times (Max of 1-3 detections), I am constantly updating to remain FUD, but updates take time.

I personally have never seen it below 5 detections. I have written him in skype, HF PM and his Support Website with no help whatsoever.

He will reply saying that you should use HQ images in the document or a different direct link and blah blah blah, but never gives real support and never fixes the real problems.

So in your own ToS you have these:

4. The product may not be 100% FUD at all times (Max of 1-3 detections), I am constantly updating to remain FUD, but updates take time.

5. Flaming on the thread will NOT be tolerated and you will risk your licence if you proceed to after being warned (If you have a problem please PM or email me)

YOU BROKE YOUR OWN ToS FIRST SO WHEN I POST ON YOUR SALES THREAD THE TRUTH BAN MY LICENSE IF YOU WANT BECAUSE IT DOESN'T MATTER, YOUR PRODUCT IS SHIT AND DOESN'T WORK ANYWAYS.

So how long has it been since you haven't received any support? I mean you need to include some proof of your claims, etc.

Daigo. - July 21, 2016, 11:33 am

There is no proof and I feel like you didnt even try to fix the issue.

Qismon - July 21, 2016, 11:37 am

As you were saying???.....you guys are obviously not customers or you can't get your mouth of his tit!

@pdapentester, just ignore these hardcore Mon£y supporters that are asking for proof. What difference will it make if you problem all the proof to them? The fact is we need to speak up against such scam artists that presents themselves as coders. That fraud called Mon£y is a fake and I assured him I will do everything to bring his scam to a halt. I was also scammed and he threatened to ban my license, (which is by all means useless) if I post my experience on his sales thread. I couldn't have that rat threaten me hence, I posted on his thread and that really encouraged a lot of other users with similar experience to post their similar encounter on his sales thread. I appreciate you doing this so other unsuspecting buyers will not fall for his scam.

Qismon - July 21, 2016, 2:22 pm

Thanks KentOo for sure he has multiple accounts that's where the supporters come from.

Not sure if he has banned my license or not yet, don't care because I don't trust him. Already deleted the program and wiped my system clean so he can't push any "special updates" to my computer.

Lets see how long he takes to close his current sales thread and open a new one. I'll be posting there as well to warn everyone!

What the hell is your guys problem?

You're saying I haven't provided support, but the images you uploaded clearly show me replying to you and trying to get down to why you had detections.

I work very hard on Office Exploit Builder, I spent the majority of my time working on it & supporting users.

I replied to every email you sent, trying to help.. Then you have the cheek to post a scam report?!

You pay a small amount of money for a lot of my time. I can't believe your accusations, saying I've got multiple accounts to fake supporters? How far is your head stuck up your arse mate?

We can solve this in a professional manner, just email me and I'm happy to sort this out for you.. Or you can carry on acting like a child throwing a tantrum.

You always say "Take down your comments and I will help you" it's good damage control but you never help after, you just come back with the same bullshit about an update coming out....YOU'RE A BROKEN RECORD! Change the track..

Instead of wasting your time replying here why don't you fix the problem for everyone that has one.....? Because you can't polish a turd to be something else, shit is shit!

tissuehalf - July 30, 2016, 3:40 am

@Mon£y is fucking scammer beware he tell lies shows screen of blank documents his macros are not FUD he is bloody scammer

<https://hackforums.net/showthread.php?tid=5321276&pid=52060655#pid52060655> look at this :D

Eagle eye nike - August 12, 2016, 10:39 pm

why is this thread not been attended to? This should be seriously looked into. I am totally confused on what to believe about this builder, I am a customer but since I purchased this (over 6 months ago) it never worked for me or rather It has never been FUD or even between the least detection promised on the thread (1-3) . I have seeked for support severally yet that didn't change the detections. Next time I will reply here I will post the pictures of our support conversations(I have been storing them since for reference purpose just in case...) .

I have not yet concluded on what to believe about his product

harryjake - August 19, 2016, 2:25 pm

Oh, so sorry guys.. Was about buying it.. :)

TILL TODAY IT IS SUPER STORY, I WILL REFUND YOU THEN GET YOU REGULAR EXPLOIT.
TILL TODAY REFUND I DIDN'T GET AND REGULAR EXPLOIT I DIDN'T GET.
ALL HE DO IS PLEADING THROUGH MY E-MAIL TO DELETE MY POST ABOUT HIS FAKE
ASS.

I WILL COPY ALL EMAIL EXACTLY AND POST IT EVERYWHERE..... UNTIL HE COMPLY AND I
WILL ALSO PRONOUNCE IT

Okay so you're going to spam the forum, going on a personal vendetta to trash his sales.

Have you ever actually followed his support? Did you email him? Have you tried using it on different documents?

It's very hard to keep it FUD- but I agree that it should not be advertised as FUD if it has detections. He did, however state that it might have detections at any given time. This is probably due to skids such as yourself scanning it on websites that you shouldn't.

Why are you trying to solve the problem like this? You've given no high quality feedback on this

thread.

I don't mean good feedback, I mean that even your trashing (which is fair if you haven't gotten what you've paid for) have been low quality posts. This is not the correct way to deal with it, and I wouldn't deal with your problems if you act like this.

You also said that you have email logs, so let's see them. You've implied that he is trying to help, so I want to see that. Money should and will help you (I will also try) IF you stop acting like a child. We're professionals here, so let's solve it as such.

A summary:

- OP bought something and thinks that he didn't get what he paid for because it's detected. Money stated that it gets some detections, and said that he has tried to help you
- OP said that he has received no support but the evidence suggests otherwise
- OP acts like a child on the thread and so it dies. I am here to help if he stops acting this way.
- Mon£y tries to help but is flamed. Let's stop.

Course of action is OP acts professionally.

This also means that any fixes will be attempted, he will act professionally instead of flaming or breaking the TOS or forum rules.

- A fix for the defections
- A fix with support (in thread by me or via emails)
- Further action if no support fixes work after trying.

I'll be back. We are here to help. I'm not affiliated with money, but I'm sure he wants to help too. Feel free to reply :)

User did not reply and so I would consider this closed. I'll check back, though.

FoolishWare - May 11, 2018, 7:50 am

They arent fud and he took over a month to send me the product super bad business practices

Qismon - May 14, 2018, 1:15 pm

Forgot I had this thread open still but yeah agreed.

His business plan is the same still since years and still way to complex for newbies to understand.

Step 1: Tell everyone to wait for new update...

Step 2: Push Shit...and return to Step 1

But you all just keep buying it because it has nice shiny buttons.

Whenever you want, pay me the price he charges and I will teach you how to make macros on your own.

hdcryme - September 5, 2018, 2:12 am

Mon£y IS A COMPLETE RIPPER. HE WILL RIP YOU AND TALK TRASH ABOUT FAMILY SICKNESS AND WILL NEVER PROVIDE YOU WITH PRODUCT. ASKING TO DOWNLOAD AND INSTALL SPY ON YOUR PC SO THAT YOU CAN HACK YOU COMPLETELY
