Thread: [Easy way to get paid online with Xp.to link shortner](#)

david93 - July 21, 2016, 1:33 pm

Hello all, if you are a starter and really need to make money online Xp.to is a great option to earn more with a few simple steps:

1. Register your self an account at xp.to

2. Find some really interesting files like movies, website templates, scripts, music, games, eBooks anything that suits you and upload it to # and shorten the download link using Xp.to, or if you are lazy to upload files just find some good content and shorten the download link. The advantage of using Xp.to is it pays for all the traffic unlike other link shortners

3. After you have your shortened link copy the URL and share it on popular blog such as Reddit or social media platforms such as facebook and twitter to have all your friends to give more exposure for your content.

4. As soon as people start clicking on your link you will see the money flowing in your account. Good Luck!

I have been using this method to make money online, so far I am making over 160 dollars per day.

If you have more ideas or suggestions please comment below

Share with me your ways and i'll make it worth your while.I normally search for download links and online streaming movie website and convert them into Xp.to short URLs. Then just spread them on different movie or film related forums or Facebook groups, anything you can think of basically.

Also Pokemon Go related topic is extremely hot on Reddit, just try to create any interesting topic or find interesting memes or videos and share them on Reddit. If one of them triggers and people start liking or commenting on ur post it is possible to get over 10 thousand clicks just by that one post.

If you can think of any other effective way of doing it, feel free to share with me too. :)
