Thread: [\[HELP\] Why i cant extract .exe](#)

Husnona - July 21, 2016, 1:44 pm

Hey so all rats, keylogs are viruses and when i want extract some rats i cant .exe files didnt be extracted, my antivirus is off. Any soliutions?

ram32142 - July 21, 2016, 2:09 pm

what software are you using ?
darkcomet cybergate etc...

Husnona - July 22, 2016, 10:16 am

yes Darkcomet and i tried with others but same

Kayvh - July 22, 2016, 10:45 am

Turning off your anti virus wont stop it from deleting it.. you will have to turn off windows defender and disable your firewall.

Unkind_ - July 22, 2016, 1:18 pm

Erm, it's pretty simple; Turn off the Defender, Turn off the firewall and make sure the file is named to windows executable (Skidtool.exe) not (Skidtool.js). ?

Hope I helped; Wild_Card ?

1. Make sure you are Admin of your pc (and your account).
2. Turn Off windows defender
3. Disable Firewall.

TheCrazyGuy - July 22, 2016, 2:17 pm

Steps:

1. Make sure that you are the Admin of your computer and your account too.
2. If you have a antivirus, disable, you can search how to disable it on google.
3. If any this steps doesn't worked, disable windows defender too. If you don't know how to disable windows defender, google is a good friend to help you.
4. And then, you can extract the rats that you want.

Husnona - July 23, 2016, 1:35 am

Hey so it didnt helped me. I disabled my windows defender, firewall, and my Microsoft security essentials, and still deleting rat after extraction from winrar. Any other soliutions?

I'm guessing it has something to do with the Rat then, try a different one if at all possible.

Hope I helped; Wild_Card ?
