Thread: [Scammed by BULL uid=1844212 \(EXE Protector\)](#)

Qismon - July 21, 2016, 4:40 pm

Bought the crypter less than 2 weeks ago for lifetime 79.99USD BTC and never could get it FUD and while I was waiting for support that never happened, the project closes WTF!

I wrote Bull asking for a refund or at least work something out so my money is not a complete loss.....shity crypter, shity support, just Bull-Shit!

I'm sure there are still quality ones but for every quality seller there are 20 more that are garbage! I know more people see this so they should all speak up, it's the only way we will turn the market around.

I am from IN and agree with you lol..

Well to Bull -- you shouldn't have closed the project bhai.. or atleast 1 month prior notification on thread..

Anyways, TOS are TOS.. GL OP

Anyways, TOS are TOS.. GL OPThanks yeah I agree, I payed for lifetime and use it less than 2 weeks with a 10/35 FUD rate asking for support and nothing.....I would even be fine if he refunded me a portion and kept the BTC to cover a 1 month license. That is reasonable!

Just hope people investigate and see this before they do business with him and his 19 name changes! WTF

What you just proposed seems reasonable. Have you asked him to do that?

He would only offer me a discount if I spend another 50USD.....no thanks, got scammed once, not going to buy into that shit again.

You should post a link to his profile.

Qismon - July 25, 2016, 8:58 am

His UID is in the title of the post, and I have already posted this on his sales thread, but it got deleted fast and he gave me negative rep.....oh well, going to keep posting it.

Negative rep from these cunts is all they can do, just waiting for their random profiles to negative rep me.

The same thing happened to me, I bought Platinum package : Lifetime license of crypter + 500 Bots.. for \$100

Never got the 500 bots, and never got it 100% FUD, and I asked for support, and tried all the settings that they told me and spend several days trying to make my stub FUD, and testing on VMware but did not succeed.. Now there are no updates.. And I only used for 1 and a half month.. ?

OP, hopefully you get some kind of refund or atleast some proper support.

There's a massive lack of proofs

Where's the proof it's his skype?

Where's the proof you actually bought the crypter?

The whole conversation happened in 2 minutes, a bit weird

This is true, the Skype is a bit given, but proof is always a must.

OP please give this a quick review <https://hackforums.net/showthread.php?tid=5285936>

Good luck with your dispute.

Since the only information about his skype is his display name I can tell you it's not Bull's skype
account.
