Thread: [UPnP PortMapper - Open multiple ports without forwarding\(Good utorrent alternative\)](#)

MrNRG - July 11, 2010, 8:04 am

Here is the tool to open multiple ports without ever need of forwarding it manually, much better than utorrent method because in this you can open multiple ports without any hassle. The only requirement is that your router must be UPnP enabled. You can enable it by going to Advanced setup>Lan> under router settings.

Here is my video about how to set up.

After every restart you need to run this application and click USE button to open all ports. After that you can close it.

Download:-

Code <http://upnp-portmapper.sourceforge.net/#download>

You need Java SE Runtime Environment in Version 5.0 or later to run this program.

Virustotal scan:-

<http://www.virustotal.com/analysis/fdc41af4fc4ceaef08aa1d3cf588b94aada273c2d09388e556fa5b275d3167b8-1278912142>

Note: If your router is not detected then try changing UPnP Library under UPnP PortMapper Settings.

Note:-canyouseeme may not show open ports but actually they are open, just test it yourself. You can still connect to your vics.

Supreme Kai - July 11, 2010, 8:16 am

Huh its linux ?

I hope it works and post an virusscan.

MrNRG - July 11, 2010, 10:39 am

(Jul 11, 2010 08:16 AM)[V]VenDetta Wrote: [\[CITE\]](#) Huh its linux ?

It works on every operating system because it is java based.

Here is the scan results:-

<http://www.virustotal.com/analysis/fdc41af4fc4ceaef08aa1d3cf588b94aada273c2d09388e556fa5b275d3167b8-1278912142>

Felikss - July 11, 2010, 11:11 am

Since he didn't post a virus scan here is a legit link from sourceforge:

<http://sourceforge.net/projects/upnp-portmapper/>

kagekio - July 11, 2010, 2:11 pm

ok so how do i use this? i can't find a tut

MrNRG - July 11, 2010, 10:17 pm

(Jul 11, 2010 11:11 AM)Felikss Wrote: [\[CITE\]](#) Since he didn't post a virus scan here is a legit link from sourceforge:

<http://sourceforge.net/projects/upnp-portmapper/>

Virus scan will prove nothing because it is java based. BTW my adfly link directs to the above link.

(Jul 11, 2010 02:11 PM)kagekio Wrote: [\[CITE\]](#) ok so how do i use this? i can't find a tut Follow the video made by me and everything will be clear.

Do this to open java file:-

[img]http://img694.imageshack.us/img694/414/80701788.jpg[/img]

Thanks H4c[K]st3R for provide the above sol.

kagekio - July 11, 2010, 10:33 pm

I can't even open the file in that program u go tit on. i tried runing it with Java but it will take me to download it again. help please i have Team Viewer PM me if u want to help with that.

B??N????N??R™ - July 12, 2010, 4:07 am

Thanks, will try it now and post the results. Its been 4 days ive been banging my head in order to make my RAT work. :(

Make sure you have the latest java runtime installed.

kagekio - July 12, 2010, 6:40 am

i do i have the latest version of it

MrNRG - July 12, 2010, 9:54 am

(Jul 12, 2010 06:40 AM)kagekio Wrote: [\[CITE\]](#) i do i have the latest version of itWhat is your OS?

"The message is too short. Please enter a longer message"

kagekio - July 12, 2010, 10:00 am

I have vista x64 that piece of shit OS

kagekio - July 15, 2010, 7:56 am

Thats exactly what i do but nothing happens only a command prompt shows then disapers really fast

Deceit - July 15, 2010, 8:17 am

Kagekio, I believe you don't have the CLASSPATH set up right. But maybe im wrong, I'm a Java Newb ?

MrNRG - July 16, 2010, 7:36 am

BUMP

Mine is different, you can open multiple ports with this just like in actual port forwarding. And as far as adf.ly link is concerned i can not edit the post now.

unbanable007 - July 18, 2010, 12:03 am

OMG it works! i love you. No homo

Mr.MK - July 18, 2010, 9:03 am

Does this work with Mobile Stick's ?

PLS PM!

MrNRG - July 18, 2010, 9:33 pm

(Jul 18, 2010 09:03 AM)Ixam Wrote: [\[CITE\]](#) Does this work with Mobile Stick's ?

PLS PM!

It will work with routers with UPnP support. If am not wrong Mobile stick is not router. You can try though.

azeer - *September 9, 2010, 8:19 pm*

It dosent work with modile sticks , i still struggle to find out a way to my rat.

DrVoje - *September 11, 2010, 3:29 am*

wow look so nice..thanks i will try

n1cson - *September 11, 2010, 3:55 am*

WTF, this Programm dont find my router and I changed liberarys
