Thread: [\[TUT\] Delete Any Facebook Account Guaranteed](#)

xb0y - July 11, 2010, 9:03 am

Here is a method to delete any facebook profile or account. It works 100%. But its just for educational purpose. So don't use it on anyone. Once Deleted Profile can never be recovered. Use wisely.

WHAT ALL U NEED ?

1. Victim's profile link (you can get it easily)
2. His/Her Email which he/she uses to sign in
3. His/Her birth date which he/she has used in the profile
4. Make an Email ID on gmail or yahoo with the first name and last name same as on victim's facebook profile.

HOW TO DO IT

1. Go to this page:

http://www.facebook.com/help/contact.php?show_form=hack_nologin_access

2. Enter details. In the place of ' email address where you can be contacted ' enter the fake email u created.

3. you will get a mail on that ID in which facebook people will ask your problem. Reply to them that you are XYZ(victim's name) and you cant access your facebook account. Also you have lost access to your Email Address associated with the account. You dont know what to do now. The hacker is coming online regularly and using your account. If the victim is a girl also write ' I am a girl and it poses threat to my social life ' and write anything you want that could make them take action. (no need though in 100 % cases they delete the account)

4. After 2-3 days youu will get a reply. They will again ask you that you have access to your associated Email or not? Reply them that you still don't have access to it. And repeat what all you wrote in first mail.

5. Next Day or Same Day you will get an Email that your account is disabled.

ENJOY

gmail does not send your ip in the header of the message whereas most email providers/clients do. look it up.

I have many important contacts in that account and if the person who has hacked it does anything wrong with those contacts, then I am sure that I will be fired from my job.
